**The Sea Around Them: the Atlantic Ocean AD 1250** Vincent H. Cassidy, 1968      A Proposed Explanation of the Closed Indian Ocean on Some Ptolemaic Maps of the Twelfth-fifteenth Centuries Wilcomb E. Washburn, 1985      **Ancient Ocean Crossings** Stephen C. Jett, 2017-06-06 Paints a compelling picture of impressive pre Columbian cultures and Old World civilizations that contrary to many prevailing notions were not isolated from one another In Ancient Ocean Crossings Reconsidering the Case for Contacts with the Pre Columbian Americas Stephen Jett encourages readers to reevaluate the common belief that there was no significant interchange between the chiefdoms and civilizations of Eurasia and Africa and peoples who occupied the alleged terra incognita beyond the great oceans More than a hundred centuries separate the time that Ice Age hunters are conventionally thought to have crossed a land bridge from Asia into North America and the arrival of Columbus in the Bahamas in 1492 Traditional belief has long held that earth's two hemispheres were essentially cut off from one another as a result of the post Pleistocene meltwater fed rising oceans that covered that bridge The oceans along with arctic climates and daunting terrestrial distances formed impermeable barriers to interhemispheric communication This viewpoint implies that the cultures of the Old World and those of the Americas developed independently Drawing on abundant and concrete evidence to support his theory for significant pre Columbian contacts Jett suggests that many ancient peoples had both the seafaring capabilities and the motives to cross the oceans and in fact did so repeatedly and with great impact His deep and broad work synthesizes information and ideas from archaeology geography linguistics climatology oceanography ethnobotany genetics medicine and the history of navigation and seafaring making an innovative and persuasive multidisciplinary case for a new understanding of human societies and their diffuse but interconnected development      The Christopher Columbus Encyclopedia Silvio A. Beding, 2016-02-08 The European discovery of the Americas in 1492 was one of the most important events of the Renaissance and with it Christopher Columbus changed the course of world history Now five hundred years later this 2 volume reference work will chart new courses in the study and understanding of Columbus and the Age of Discovery Much more than an account of the man and his voyages The Christopher Columbus Encyclopedia is a complete A Z look at the world during this momentous era In two volumes The Christopher Columbus Encyclopedia contains more than 350 signed original articles ranging from 250 to more than 10 000 words written by nearly 150 contributors from around the world The work includes cross references bibliographies for each article and a comprehensive index The work is fully illustrated with hundreds of maps drawings and photographs      *Trade, Travel, and Exploration in the Middle Ages* John Block Friedman, Kristen Mossler Figg, 2013-07-04 Trade Travel and Exploration An Encyclopedia is a reference book that covers the peoples places technologies and intellectual concepts that contributed to trade travel and exploration during the Middle Ages from the years A D 525 to 1492      **Through the Pillars of Herakles** Duane W. Roller, 2013-01-11 In this first study of the Greek and Roman exploration for over half a century

Duane W Roller presents an important examination of the impact of the Greeks and Romans on the world through the Pillars of Herakles and beyond the Mediterranean Roller chronicles a detailed account of the series of explorers who were to discover the entire Atlantic coast north to Iceland Scandinavia and the Baltic and south into the Africa tropics His account examines these early pioneers and their discoveries and contributes a brand new chapter to the history of exploration Based not only on the literary evidence but also personal knowledge of the areas from the Arctic to west Africa the book looks at the people from the earliest Greeks through the Carthaginians to the Romans and examines their exploration of this vast and largely unfamiliar territory Discussing for the first time the relevance of Iceland and the Arctic to Greco Roman culture this groundbreaking work is an enthralling and informative read that will be an invaluable study resource for Greek and Roman history courses

The Medieval Expansion of Europe J. R. S. Phillips, 1998 Between the year 1000 and the middle of the fourteenth century a remarkable series of events unfolded as Europeans made contact with a very substantial part of the inhabited world much of it never previously known to or suspected by them Leif Ericsson and other Vikings from Greenland discovered North America European crusading armies established themselves in Syria and Palestine Marco Polo and other Italian merchants and missionaries such as John of Monte Corvino penetrated the dominions of the Mongol great Khans as far as China the Vivaldi brothers sought to open a sea route to India Jaime Ferrer was lured by dreams of locating the source of West African gold and the Atlantic island groups the canaries Madeira and the Azores were all discovered For this Clarendon Paperback edition Professor Phillips has added a new Foreword and Conclusion as well as a bibliographical essay surveying recent work in what is becoming a thriving area of research

*The Worlds of Christopher Columbus* William D. Phillips, Carla Rahn Phillips, 1992 When Columbus was born in the mid fifteenth century Europe was largely isolated from the rest of the Old World Africa and Asia and ignorant of the existence of the world of the Western Hemisphere The voyages of Christopher Columbus opened a period of European exploration and empire building that breached the boundaries of those isolated worlds and changed the course of human history This book describes the life and times of Christopher Columbus on the 500th anniversary of his first voyage across the

Atlantic Ocean in 1492 Since ancient times Europeans had dreamed of discovering new routes to the untold riches of Asia and the Far East what set Columbus apart from these explorers was his single minded dedication to finding official support to make that dream a reality More than a simple description of the man this new book places Columbus in a very broad context of European and world history Columbus s story is not just the story of one man s rise and fall Seen in its broader context his life becomes a prism reflecting the broad range of human experience for the past five hundred years Respected historians of medieval Spain and early America the authors examine Columbus s quest for funds first in Portugal and then in Spain where he finally won royal backing for his scheme Through his successful voyage in 1492 and three subsequent journeys to the new world Columbus reached the pinnacle of fame and wealth and yet he eventually lost royal support through his own failings William and Carla Rahn Phillips discuss the reasons for this fall and describe the empire created by the Spaniards in the lands across the ocean even though neither they nor anyone else in Europe know precisely where or what those lands were In examining the birth of a new world this book reveals much about the times that produced these intrepid explorers The Fourth Part of the World Toby Lester,2009-11-03 Old maps lead you to strange and unexpected places and none does so more ineluctably than the subject of this book the giant beguiling Waldseem ller world map of 1507 So begins this remarkable story of the map that gave America its name For millennia Europeans believed that the world consisted of three parts Europe Africa and Asia They drew the three continents in countless shapes and sizes on their maps but occasionally they hinted at the existence of a fourth part of the world a mysterious inaccessible place separated from the rest by a vast expanse of ocean It was a land of myth until 1507 that is when Martin Waldseem ller and Matthias Ringmann two obscure scholars working in the mountains of eastern France made it real Columbus had died the year before convinced that he had sailed to Asia but Waldseem ller and Ringmann after reading about the Atlantic discoveries of Columbus s contemporary Amerigo Vespucci came to a startling conclusion Vespucci had reached the fourth part of the world To celebrate his achievement Waldseem ller and Ringmann printed a huge map for the first time showing the New World surrounded by water and distinct from Asia and in Vespucci s honor they gave this New World a name America The Fourth Part of the World is the story behind that map a thrilling saga of geographical and intellectual exploration full of outsize thinkers and voyages Taking a kaleidoscopic approach Toby Lester traces the origins of our modern worldview His narrative sweeps across continents and centuries zeroing in on different portions of the map to reveal strands of ancient legend Biblical prophecy classical learning medieval exploration imperial ambitions and more In Lester s telling the map comes alive Marco Polo and the early Christian missionaries trek across Central Asia and China Europe s early humanists travel to monastic libraries to recover ancient texts Portuguese merchants round up the first West African slaves Christopher Columbus and Amerigo Vespucci make their epic voyages of discovery and finally vitally Nicholas Copernicus makes an appearance deducing from the new geography shown on the Waldseem ller map that the earth could not lie at the center of the cosmos The map literally altered humanity s

worldview One thousand copies of the map were printed yet only one remains Discovered accidentally in 1901 in the library of a German castle it was bought in 2003 for the unprecedented sum of 10 million by the Library of Congress where it is now on permanent public display Lavishly illustrated with rare maps and diagrams The Fourth Part of the World is the story of that map the dazzling story of the geographical and intellectual journeys that have helped us decipher our world
