Seamless Antilandscapes:

Landscape's Revenge Caio Yurgel, 2018-11-05 Landscape as it appears and is described throughout the works of Bernardo Carvalho and Robert Walser provides an excellent yet virtually unexplored pathway to the authors literary projects The landscape functions here as a synthetic and unifying figure that triggers at first through the analysis of its description per se the main and most evident elements of the authors works However when sustained as a methodological figure beyond the scope of its own description the landscape soon reveals a darker far more fascinating and far less explored side of the authors oeuvres a vengeful seemingly defeatist resentment against the status quo which gives way to the more latent and biting elements of the authors prose such as irony the unheimlich an anti heroic agenda the apocalyptic aesthetics of a disaster prone fictional world as well as an understanding of history and literature through the figures of failure and marginality By drawing from diverse critical traditions from Latin America and Europe this comparative text seeks to unravel in all of its complexity and scope the fictional stage upon which Walser s and Carvalho s characters narrate with their dying breath a world that is slowly undoing itself
