Capt Robert B. Workman UScg (Ret)

Seaplanes And Naval Aviation:

Seaplanes and Naval Aviation Ole Steen Hansen, 2003 Incredible illustrations and photographs help document the amazing aircraft that take off from ships or land on water Exciting text describes their use in military action and rescue as well as for scientific research and commercial purposes

Float Planes and Flying Boats Capt Robert B. Workman USCG (Ret), 2017-02-15 Float Planes and Flying Boats is the first and only written history describing the Coast Guard's contribution to early Naval Aviation's development There is a Naval Aviator bond between Navy Coast Guard and Marine Corps aviators that was initiated when the three service aviation communities joined in a major Joint Operation from 1914 to 1938 to develop and grow Naval Aviation That bond drives each service to cooperate and support each other For example Coast Guard and Marine Corps aviators receive flight training at the Navy Training Command in Pensacola and the Navy loaned the Coast Guard many of their first aircraft and gave land and facilities that became early Coast Guard air stations The Coast Guard contributed to Navy activities that established Navy war fighting capabilities and provided engineering design and tests for seaplanes and aircraft carrier powder catapults and arresting gear The only difference on the Naval Aviator Roster is USN USCG and USMC after their names For example Lieutenant Stone was Naval Aviator number 38 and 20 years later was also assigned Coast Guard Aviator number 1

Float Planes & Flying Boats Robert B. Workman, 2012 Most often when Joint Operations are conducted by a larger service individual Armed Service Historians tell the story of events ignoring sometimes even trivialising participation of the other Armed Services Sometimes Navy historians inferred Navy credit for a naval event conducted by a Coast Guard individual or the Coast Guard by documenting the event but ignoring Coast Guard presence Documentation of history resulting from both similar and diverse contributions and authorities from a different sea service is lost by this historian approach For example Navy historian Roy A Grossnick in his June 2001 book *United States Naval Aviation 1910 1995* only mentions Coast Guard participation in early Naval Aviation and the World War once when The secretary of Navy was advised LT E F Stone USCG was ordered to NAS Pensacola for aviation training As this book documents Coast Guard individuals and the Coast Guard service gave many contributions to the World War and to development and growth of Naval Aviation during that period

Float Planes And Flying Boats The Coast Guard And Early Naval Aviation is a single comprehensive volume telling the history of early Naval Aviation the Navy the Marine Corps and the Coast Guard A unified history of all naval aviators it describes interrelationship and mutual support In years leading to 1920 the Marine Corps and Coast Guard did not own aircraft The three sea service's aviators flew Navy aircraft on Navy missions from Navy ships and Navy Air Stations commanded by Navy and Coast Guard aviators The bond between them was born It was a unique time The book is documented with 427 endnotes and features 281 vintage aviation photographic images and a nautical chart of historical note embedded within its text This balance of photographs and endnote documentation provides both visual and written history that will come alive for the reader

Naval Aviation in World War I Adrian O. Van

Wyen,1969 **Naval Aviation in the First World War** R. D. Layman,1996 All aspects of naval aviation in World War I are detailed in this superbly researched book *Attack from the Sea* William F. Trimble,2016-07-01 An award winning aviation historian chronicles the Navy's efforts to develop a powerful sea based strike force through the use of long range attack seaplanes supported by surface ships and submarines William Trimble traces the concept back to the early 1930s when American strategic planners sought ways to mount an assault across the Pacific with minimum air support But it was not until 1950 when the Navy was threatened with losing its big carriers and long range aircraft that the idea of a Seaplane Striking Force was resurrected Lured by breakthroughs in seaplane performance and the promise of the turbojet powered Convair Sea Dart fighter and the Martin Sea Master attack flying boat the Navy believed it could challenge the Air Force in the strategic role the author explains but found that the technology did not live up to expectations This book investigates the difficulties of weapon system procurement within the context of strategic realities interservice rivalry and constrained defense budgets It also looks at an alternative weapon system that the Navy saw as a means of extending its conventional reach and as a complement to the carrier and land based bomber used for nuclear deterrence That weapon however proved unsuccessful in the end The author helps the reader understand that while conceptual and operational flaws kept the Seaplane Striking Force from achieving the goals set for it the idea of a mobile weapon system capable of long range attacks from the sea remains valid Other books touch briefly on the subject but this is the first to examine the concept in depth

Naval Aviation News ,1952 **United States Naval Aviation, 1910-60** United States. Office of the Chief of Naval Operations,1960 World War I Seaplane and Aircraft Carriers Mark Lardas,2016-09-22 In 1910 the first aircraft was successfully launched from a small wooden platform on a stationary ship Just four years later seaplane carrying warships were being used to launch the first naval air raids and by 1918 the first aircraft carrier to feature a full length flight deck was in service High quality artwork and historical photographs help author Mark Lardas tell the fascinating story of the pioneering years of naval aviation covering such historic clashes as the Japanese siege of Tsingtao the British raid against German Zeppelin bases at Cuxhaven and the Battle of Jutland which saw the first airplane take part in a naval battle Through detailed analysis he explores their development from hastily adapted merchant ships to the launch of HMS Argus the first aircraft carrier to have a full length flight deck and shows how they paved the way for the aircraft carriers of the future

US Naval Aviation, 1898-1945 Leo Marriott,2021-06-09 This pictorial history tells the story of US naval aviation from its early beginnings in the 1920s to its dominance in the Pacific theater of WWII The Japanese attack on Pearl Harbor sank or crippled almost all of the battleships in the US Navy's Pacific Fleet But the fleet's aircraft carriers survived and soon demonstrated the power of US naval aviation Thanks to pioneering technology and far sighted pre war policy the US Navy had the necessary ships aircraft and crews to turn the tide of the Pacific war With more than 200 rare photographs Leo Marriott traces the growth of US naval aviation from the flimsy seaplanes of the first years of the twentieth century to the

mighty armadas that challenged those of the Japanese and after the carrier battles at Coral Sea and Midway led the advance across the Pacific Marriott puts special focus on the navy's first aircraft carriers of the 1920s the tremendous progress made in the decades between the wars in tactics and strategy and the innovative design of ships and aircraft themselves
