Malebranche: The Search After Truth Nicolas Malebranche, Paul J. Olscamp, 1997-05 Distinguished translation of the major work by a figure of crucial importance to the Enlightenment The Search after Truth and Elucidations of the Search after Truth Nicolas Malebranche, 1980 *Malebranche: The Search after Truth* Nicolas Malebranche, 1997-05-01

Malebranche is now recognized as a major figure in the history of philosophy occupying a crucial place in the Rationalist tradition of Descartes Spinoza and Leibniz The Search after Truth is his first longest and most important work this volume also presents the Elucidations that accompanied its third edition the result of comments that Malebranche solicited on the original work and an important repository of his theories of ideas and causation Together the two texts constitute the complete expression of his mature thought and are written in his subtle argumentative and thoroughly readable style *The Search After Truth* Nicolas Malebranche, Thomas M. Lennon, 1980 **The Blackwell Companion to Philosophy** Nicholas

Bunnin, Eric Tsui-James, 2003 An introduction to philosophy looks at key issues figures and movements in the field **Cogito and the Unconscious** Slavoj Zizek, 1998-04-08 Edited volume that discusses the relationship of philosophy and psychoanalysis **Oxford Studies in Early Modern Philosophy, Volume XI** Donald Rutherford, 2023-02-09 Oxford

Studies in Early Modern Philosophy is an annual series presenting a selection of the best current work in the history of early modern philosophy It focuses on the seventeenth and eighteenth centuries the extraordinary period of intellectual flourishing that begins very roughly with Descartes and his contemporaries and ends with Kant It also publishes papers on thinkers or movements outside of that framework provided they are important in illuminating early modern thought The articles in OSEMP will be of importance to specialists within the discipline but the editors also intend that they should appeal to a larger audience of philosophers intellectual historians and others who are interested in the development of modern thought

Causation and Laws of Nature in Early Modern Philosophy Walter Ott, 2009-09-03 Causation and Laws of Nature in Early Modern Philosophy is a study of one of the most important debates in 17th and 18th century philosophy the nature of causation Ott offers controversial readings of such canonical figures as Descartes Locke and Hume and explores related topics such as intentionality necessity and relations Dispositions and Causal Powers Bruno Gnassounou, 2016-05-23

Dispositions are everywhere We say that a wall is hard that water quenches thirst and is transparent that dogs can swim and oak trees can let their leaves fall and that acid has the power to corrode metals All these statements express attributions of dispositions be they physical physiological or psychological yet there is much philosophical debate about how far if at all dispositional predicates can have complete meaning or figure in causal explanations This collection of essays by leading international researchers examine the case for realism with respect to dispositions and causal powers in both metaphysics and science Among the issues debated in this book is whether dispositions can be analyzed in terms of conditionals whether all dispositions have a so called categorical basis and if they do what is the relation between the disposition and its basis

Berkeley's 'Principles of Human Knowledge' Alasdair Richmond, 2009-03-01 Berkeley's Principles of Human Knowledge is a key text in the history of British Empiricism and 18th century thought. As a free standing systematic exposition of Berkeley's ideas, this is a hugely important and influential text central to any undergraduate's study of the history of philosophy.
