Search For Extraterrestrial Intelligence:

Is Anyone Out There? Frank Drake, Dava Sobel, 1993 **The Search for Extra Terrestrial Intelligence** David Lamb, 2005-07-26 Is the Search for Extra Terrestrial Intelligence a genuine scientific research programme David Lamb evaluates claims and counter claims and examines recent attempts to establish contact with other intelligent life forms He considers the benefits and drawbacks of this communication how we should communicate and whether we actually can He also assesses competing theories on the origin of life on Earth discoveries of former solar planets proposals for space colonies and the consequent technical and ethical issues **Searching for Extraterrestrial Intelligence** H. Paul Shuch, 2011-02-14 This book is a collection of essays written by the very scientists and engineers who have led and continue to lead the scientific quest known as SETI the search for extraterrestrial intelligence Divided into three parts the first section The Spirit of SETI Past written by the surviving pioneers of this then emerging discipline reviews the major projects undertaken during the first 50 years of SETI science and the results of that research In the second section The Spirit of SETI Present the present day science and technology is discussed in detail providing the technical background to contemporary SETI instruments experiments and analytical techniques including the processing of the received signals to extract potential alien communications In the third and final section The Spirit of SETI Future the book looks ahead to the possible directions that SETI will take in the next 50 years addressing such important topics as interstellar message construction the risks and assumptions of interstellar communications when we might make contact what aliens might look like and what is likely to happen in the aftermath of such a contact **The Search for Extraterrestrial Intelligence, SETI** Philip Morrison, John Billingham, John Wolfe, 1977 **SETI, the Search for Extraterrestrial Intelligence**, 1990 *Looking for Life in the Universe* Ellen Jackson, 2002 Investigates how scientists particularly Jill Tarter Director of the SETI Institute in Mountain View California use twenty first century technology to investigate whether life exists on other planets **Waiting for Contact** Lawrence Squeri, 2016-08-31 A cogent engaging history of humanity's most ambitious quest seeking outward for other minds David Brin author of *Existence* A fascinating perspective on humankind's obsession for knowing if there is anyone else out there Gerrit L Verschuur author of *The Invisible Universe* The Story of Radio Astronomy Squeri has written what will likely be the definitive history of the early days of SETI that includes profiles of some of its leading characters Ben Zuckerman coeditor of *Extraterrestrials Where Are They* An insightful history that explores the scientific foundations of the modern day search for our place in the cosmos *Waiting for Contact* delivers unparalleled access to the inner history of SETI and invites us to ride along on the journey to answer one of science's ultimate questions Are we alone Douglas Vakoch president METI International *Waiting for Contact* is a balanced account telling the tale of the search for extraterrestrial intelligence without the overpromise usually trumpeted by enthusiastic proponents and the hyperventilation so commonly added by UFO enthusiasts If you are simply interested in the history unvarnished by an agenda you'll enjoy this book Don

Lincoln author of *Alien Universe* Extraterrestrial Life in Our Minds and in the Cosmos Imagine a network of extraterrestrials in radio contact with each other across the universe superior beings who hail from advanced civilizations quadrillions of miles away just waiting for Earth to tune in Some people believe it s only a matter of time before we discover the right station Waiting for Contact tells the story of the Search for Extraterrestrial Intelligence SETI movement which emerged in 1959 as astronomers began using radio telescopes to listen for messages from space New technological developments turned what once was speculation into science Boosted by support from Frank Drake Philip Morrison Carl Sagan and the genre of science fiction the SETI movement gained followers and continues to capture imaginations today In this one of a kind history Lawrence Squeri looks at the people reasons goals and mindsets behind SETI He shows how it started as an expression of the times a way out of Cold War angst with hope for a better world SETI s early advocates thought that with guidance from technically and ethically advanced outsiders humanity might learn how to avoid horrors like nuclear annihilation and societal collapse from overpopulation Some hoped that good news from outer space might reveal a cure for cancer or even the secret of immortality Squeri also describes the challenges SETI has faced over the years the struggle to be taken seriously by the scientific community and by NASA competition for access to radio telescopes perpetual lack of funding and opposition from influential politicians He covers the rise and fall of Soviet SETI and the few rare meetings between Soviet and American astronomers Despite many setbacks the movement pressed forward with the aid of private donations and developed outreach programs Volunteers can now help search for new civilizations on their personal computers by joining the SETI Home project Today SETI researchers continue to see themselves as explorers They often identify with Columbus and just as Columbus never realized the full implications of his discovery we cannot predict what will happen if contact is made This book points out that if against all expectations the embattled SETI movement finally succeeds the long awaited first signal picked up by its radio antennas will usher the greatest shift in human history A new adventure will begin Lawrence Squeri is professor emeritus of history at East Stroudsburg University

Making Contact Sarah Scoles, 2017-07-04 For anyone who has ever looked up at the night sky and wondered Are we alone A brilliant examination of the science behind the search for extraterrestrial intelligence and its pioneer Jill Tarter the inspiration for the main character in Carl Sagan s *Contact* Jill Tarter is a pioneer an innovator an adventurer and a controversial force At a time when women weren t encouraged to do much outside the home Tarter ventured as far out as she could into the three Kelvin cold of deep space And she hasn t stopped investigating a subject that takes and takes without giving much back Today her computer s screensaver is just the text SO ARE WE ALONE This question keeps her up at night In some ways this is the question that keep us all up at night We have all spent dark hours wondering about our place in it all pondering our aloneness both terrestrial and cosmic Tarter s life and her work are not just a quest to understand life in the universe they are a quest to understand our lives within the universe No one has told that story her story until now It all began with gazing into the night sky All those stars were just

distant suns were any of them someone else's sun Diving into the science philosophy and politics of SETI searching for extraterrestrial intelligence Sarah Scoles reveals the fascinating figure at the center of the final frontier of scientific investigation This is the perfect book for anyone who has ever looked up at the night sky and wondered if we are alone in the universe

Seti Pioneers David W. Swift, 1993-09 Are there beings in some sense like you elsewhere in the universe or are we the only ones around It's one of the most basic questions there is Carl Sagan Carl Sagan when asked his assessment of the importance of the search for extraterrestrial intelligence SETI replied You find out who you are It's a basic question Are there beings in some sense like you elsewhere in the universe or are we the only ones around It touches deeply into myth folklore religion mythology and every human culture in some way or another has wondered about that kind of question It's one of the most basic questions there is Why did some scientists decide to conduct a search for extraterrestrial intelligence What factors in their personal development predisposed them to such a quest What obstacles did they encounter along the way To learn about their search to preserve historical information not otherwise available and to discover more about how scientific fields originate and develop sociologist David Swift interviewed the first scientists to be involved in this fascinating quest These SETI Pioneers reveal not only their involvement in the search but also the facets of their personal backgrounds that led them to participate family education intellectual growth and their speculations about the nature of extraterrestrial life Each interviewee is asked the same set of questions to facilitate comparison of how their careers developed Introductory text by Swift reviews the emergence of SETI and early attempts to detect extraterrestrial life a concluding interview with Paul Horowitz a leader in the new generation of SETI scientists reflects on the contributions of the pioneers While a host of books have considered the search for extraterrestrial intelligence none has considered the motivations of the individuals who initiated it nor have any books documented from the participant's perspective the emergence of a new field of science while it was actually evolving This collection of interviews thus sheds important light not only on the search for other life forms in our universe but also on the nature of scientific discovery

The Eerie Silence Paul Davies, 2010-04-02 Refreshing A penetrating analysis of the assumptions that underlie SETI and the entire enterprise of searching for life beyond Earth Chris McKay Nature Fifty years ago a young astronomer named Frank Drake first pointed a radio telescope at nearby stars in the hope of picking up a signal from an alien civilization Thus began one of the boldest scientific projects in history the Search for Extraterrestrial Intelligence SETI After a half century of scanning the skies however astronomers have little to report but an eerie silence eerie because many scientists are convinced that the universe is teeming with life Physicist and astrobiologist Paul Davies has been closely involved with SETI for three decades and chairs the SETI Post Detection Taskgroup charged with deciding what to do if we're suddenly confronted with evidence of alien intelligence He believes the search so far has fallen into an anthropocentric trap assuming that an alien species will look think and behave much like us In this provocative book Davies refocuses the search challenging existing ideas of what form an alien intelligence might take

how it might try to communicate with us and how we should respond if it does Paul Davies gives us a panoramic view of the quickening search for cosmic company a fascinating tale stuffed with novel ideas about the nature of intelligence far beyond our own Seth Shostak Senior Astronomer SETI Institute An immensely readable investigation of the SETI enterprise A wonderful book New Scientist A far ranging look at what might happen here on Earth when we make first contact Highly recommended for both science fiction and astronomy buffs Publishers Weekly
