Civilizations and World Order Fred Dallmayr, M. Akif Kayapinar, Ismail Yaylaci, 2014-09-24 *Civilizations and World Order* Geopolitics and Cultural Difference examines the role of civilizations in the context of the existing and possible world orders from a cross cultural and interdisciplinary perspective Contributions seek to clarify the meaning of such complex and contested notions as civilization order and world order they do so by taking into account political economic cultural and philosophical dimensions of social life The book deals with its main theme from three angles or vectors first the geopolitical or power political context of civilizations secondly the different roles of civilizations or cultures against the backdrop of post coloniality and Orientalism and thirdly the importance of ideological and regional differences as factors supporting or obstructing world orders All in all the different contributions demonstrate the impact of competing civilizational trajectories on the functioning or malfunctioning of contemporary world order

Gerlak, 2009-08-18 This groundbreaking study maps out and analyzes the development of a global intergovernmental IGO institutional architecture in the post World War II era Systematically traces similarities and differences between the institutional architecture of the Cold War and post Cold War eras Examines the range of reasons why states join IGOs identifies patterns of participation within these organizations and examines the effects of membership on states Considers the impact of the EU on other regional organizations and developments outside Europe Provides a strong contribution to the study of international organization and IGO development combining both quantitative and qualitative methodologies

Systemic Earthquake and the Struggle for World Order Ahmet Davutoğlu, 2020-01-23 Using the analogy of a devastating series of earthquakes Davuto lu provides a new theoretical approach conceptualization and methodology for understanding crisis in the post Cold War era In order to grasp the scale and scope of the ongoing crises we are experiencing today Davuto lu conceptualizes them as aftershocks following in the wake of the four great quakes that have shaken the world in recent times namely the geopolitical earthquake triggered by dissolution of the Soviet Union 1991 the security earthquake post 9 11 2001 the economic earthquake associated with the global economic crisis 2008 and the structural earthquake of the Arab Spring 2011 By contextualizing international order as being impacted by a number of intertwined processes the book then looks to the possible futures ahead Following his analysis of the ongoing systemic crisis Davuto lu forges a vision for a new order of global democracy built from the rubble of the systemic earthquake

New World Order and Small Regions Emil Avdaliani, 2022-08-29 The book provides a comprehensive understanding of the unfolding geopolitical changes in the South Caucasus in the age of increased great power competition across Eurasia Recent research on the geopolitics of the South Caucasus focuses either on interstate relations among Armenia Azerbaijan and Georgia or on each of regional actors Russia Turkey and Iran ties with the region's one or all three states Little attempt has been made to see the region's shifting geopolitical importance from a global perspective growing US China rivalry and

shifting balance of power in Eurasia recalibration of the US military and diplomatic vision in western Eurasia to adjust to the Chinese challenge The book argues from a theoretical point of view that the increased competition in the region fits into the global pattern of unfolding great power competition when military and economic calculations drive regional powers to increase their influence on immediate neighborhoods sidelining the collective West from the negotiating table and the emerging new security architecture *States, Civilisations and the Reset of World Order* Richard Higgott, 2021-09-16 This book evaluates the current state of world dis order at a time of growing populism nationalism and pandemic panic It distils the implications of the civilisational state for world order The retreat of US leadership is mirrored by the decline of both the material and normative liberal multilateral infrastructure it supported Meanwhile the rise of China as a challenger is accompanied in political economic and cultural terms by other emerging powers no longer bound to the norms of 20th century world affairs notably Turkey India China and Russia By emphasising a cultural lens of analysis alongside robust political and economic analysis the author offers a prescriptive agenda for the coming post pandemic age that recognises the changing powers of civilisational state and hybrid non state actors Without overestimating their probabilities he outlines prospects and preconditions for effective inter civilisational dialogue and proposes a series of minimal conditions for a multilateral reset This book will appeal to public and private decision makers the media the educated lay public and civil society actors interested in the rise of civilisational politics and its possible consequences for world affairs It will be of particular interest to students and researchers in the fields of politics international relations international political economy geopolitics strategic studies foreign policy and social psychology **National Geographic Almanac of World History** Patricia Daniels, Stephen Garrison Hyslop, 2014 Traces the history of how humankind evolved from its first beginnings to the complex societies that exist today **Pluralism and World Order** Feng Zhang, 2023-03-02 This volume explores the implications of pluralism for international order Distinguished contributors from around the world offer insights into the character of a pluralistic world order They focus especially on the manifestations of international pluralism in great power relations multilateralism and regionalism Contributors examine the myriad challenges a pluralistic world order will face in the years ahead yet they eschew alarmist conclusions There is still scope for the great powers to better manage their relations and equally important much space for multilateralism and regionalism to play their increasingly important roles in stabilizing world order Distinctive in bringing the themes of pluralism and world order together in both theoretical exposition and policy discussion this book offers a stimulating reading for scholars and practitioners of world politics

Understanding the New World Order Jide Owuoye, 1993 [Japan's Quest: The Search for International Recognition, Status and Role](#) Warren Hunsberger, 2016-09-16 An international team of ten specialists in Japanese and American foreign relations address the crucial question what role should Japan play in international affairs They try to find a satisfactory answer to a concern which was first raised in the mid 19th century **Globalization and Civilizations** Mehdi

Mozaffari, 2003-09-02 Globalization and Civilizations challenges established assumptions about the nature of civilizations and the supposed inevitability of the conflict between the Islamic and Western worlds. Uniquely, this edited book critically interrogates the concept of civilization by asking whether it is still valid in the globalized world economy of the twenty-first century. The first half of the book provides an historical and theoretical context to understand the idea of civilization in political science and demonstrates how the various social, economic, political, and cultural processes of globalization have radically altered perceptions of civilization. The second half of the book looks particularly at non-Western examples of the interaction between globalization and civilization and includes case studies on the Arab world, Islam, China, India, and Europe.
