Dancer, 2006 As his stories unfold Daniel Dancer reflects on spirituality indigenous knowledge quantum physics psychology and ecological principles Humor synchronicity delight and heartfelt struggle are all present in these tales The result is a breath of wholeness a gift for our apocalyptic times and for a culture that has forgotten its connection to nature The sacred magical role that art has held in everyday life since the dawn of humanity is often lost in modern society Dancer s timely work is a quest to revive this form of art weaving the

shards of our failing culture and fragmented ecosystems into a celebration of possibility Entertaining full of surprise at every turn and beautifully illustrated Desperate Prayers helps map the way home to our authentic selves The Seat of Consciousness in Ancient Literature Richard E. Lind,2015-01-09 For early civilizations consciousness and the sense of self were experienced as located in the center of the body most often near to or within the physical heart Enlightenment was understood as the illumination of a transformed spiritual heart Thus the mind of the body as a whole was represented by the heart soul In contrast modern culture places consciousness within the brain resulting in a mind body dualism This separation of mind and body has recently been emphasized as characteristic of the psychopathologies of the modern self This volume explores the understanding and experience of consciousness in the earliest civilizations before about 500 BCE Beginning with a description of ancient Western and Eastern heart consciousness the psychological and spiritual manifestations of the ancient mature heart soul are summarized Ancestor worship lineage identity primitive consciousness and the ways in which the external world was mirrored by the inner world provide additional clues about the experience of heart consciousness Finally the work addresses the fundamental changes in the experience of consciousness that led to the mind body dualism of today
