Linguistics and Natural Language Processing Corpus Linguistics and Language Resources and General Linguistics Loan Phonology Andrea Calabrese, W. Leo Wetzels, 2009-11-30 For many different reasons speakers borrow words from other languages to fill gaps in their own lexical inventory The past ten years have been characterized by a great interest among phonologists in the issue of how the nativization of loanwords occurs The general feeling is that loanword nativization provides a direct window for observing how acoustic cues are categorized in terms of the distinctive features relevant to the L1 phonological system as well as for studying L1 phonological processes in action and thus to the true synchronic phonology of L1 The collection of essays presented in this volume provides an overview of the complex issues phonologists face when investigating this phenomenon and more generally the ways in which unfamiliar sounds and sound sequences are adapted to converge with the native language's sound pattern This book is of interest to theoretical phonologists as well as to linguists interested in language contact phenomena As of January 2019 this e book is freely available thanks to the support of libraries working with Knowledge Unlatched *Handbook of Natural Language Processing* Robert Dale, Hermann Moisl, Harold Somers, 2000-07-25 This study explores the design and application of natural language text based processing systems based on generative linguistics empirical corpus analysis and artificial neural networks It emphasizes the practical tools to

Perception and Metaphor Qin Xiugui,Tie Yi,2021-07-28 Cognitive linguists believe that metaphors are prevalent in human thought while metaphorical structures are reflected at the linguistic level Therefore analysing extensive language data can aid in revealing the metaphorical mappings of embodied experience with the senses of vision hearing smell taste touch and temperature This volume seeks to discover the similarities and differences between the metaphorical systems of the English and Chinese languages Adopting a comparative view the authors examine the semantic extensions of perception words in English and Chinese in order to reveal the metaphorical scope of each sense and the metaphorical system behind it They argue that the metaphorical systems of the senses not only help us understand and use conventionalised metaphorical

expressions but also allow us to create novel expressions The findings also unveil how abstract concepts are constructed via cognitive mechanisms such as image schema and metaphor This title is a useful reference for scholars and students who are interested in cognitive linguistics comparative linguistics and the philosophy of language *The Development of a Lexical Tone Phonology in American Adult Learners of Standard Mandarin Chinese* Sylvia Henel Sun,1998 The study reported in this volume is based on three decades of research on the SLA of Mandarin tone It investigates whether differences in learners tone perception and production are related to differences in the effects of certain linguistic task and learner factors
