Looking At China Looking At Other Countries:

China Looks at the West Christopher A. Ford, 2015-07-28 Chinese leaders have long been fascinated by the US but have often chosen to demonise America for perceived cultural and military imperialism Especially under Communist rule Chinese leaders have crafted and re crafted portrayals of the US according to the needs of their own agenda and the regime s self image Christopher A Ford investigates what these depictions reveal about internal Chinese politics and Beijing s ambitions in the world today

The South China Sea: A Look into China's Modern Times Maritime Silk Road and Its Geopolitical Implications Fritz Dufour, Linguist, MBA, DESS, 2017-07-08 Westward expansion has always been more important to China than eastward expansion because except for the Korean peninsula and Japan China is looking at the vast Pacific Ocean The west has always been and continues to be China s lifeline China has come a long way Civilizations rise and fall They come and go But the Chinese civilization is one of the oldest and most stable The Chinese engaged in world trade way before America was even discovered They did that thanks to the Silk Road which was an ancient caravan route linking Xi an in central China with the eastern Mediterranean It was established during the period of Roman rule in Europe and took its name from the silk which was brought to the west from China Although trading with the West was quintessential China has always sought to retain their own economic model When the four leading powers of the West England France Spain and Portugal decided to build their politico economic empires on triangular trade or face failure China was thriving as it had been for millennia But World War II dealt a serious blow to China s economy as the United states emerged as the only superpower on both the political and economic levels and put shortly after a policy of containment towards China That along with past failures exacerbated if not China s resentment at least its mistrust towards the West and especially towards the United States

Looking West. The Rise of Asia in the Middle East Valeria Talbot, Ugo Tramballi, 2020-09-09 As the world s economic and political centre of gravity moves increasingly towards East and South Asia we can expect a number of countries in these regions to devote more attention to the Middle East The relations between East and South Asia and the Middle East have significantly expanded as a result of the global rise of Asian economic powers particularly China India Japan and South Korea Not only oil but also trade investment infrastructure and tourism is the name of the business with the MENA region Beyond energy and economic interests questions arise about the potential geopolitical dimension of these evolving ties What are the strategic implications of the projection of Asian countries in an unstable fragmented and volatile region How do they interact with each other and with other international players Last but not least will the Covid 19

pandemic be a game changer in re shaping relations in the future *A Look at China and Sino-Belarus Cooperation* Kiryl Rudy,2021-01-08 This book is simultaneously a scientific study a practical guide and diplomatic memoir about the new era in China s development which began in 2013 with Xi Jinping coming to power It explores the modern Chinese experience of the political centralization of power the fight against corruption strengthening the country s defense system reinforcing the country s diplomacy the political rapprochement between China and Russia and exacerbation of relations with the United States It also considers issues of China s adjusting its policy of reforms and its openness to a new era transforming inefficient state owned enterprises building an IT focused country and overcoming phobias in the construction of the Belt and Road initiative related to the debt trap and the trade deficit as well as the role of the Huawei Corporation A separate section of the book is devoted to Belarus China relations exploring the reasons for the political rapprochement between these two very different countries **Iran and China** Shirzad Azad,2017-02-09 Because of their historical roles and politico economic significance in contemporary international politics Iran and China have perpetually been in the crosshairs of both policy circles and interested observers in almost every other part of the world Crucial interactions touching upon any aspect of Tehran Beijing ties from diplomatic and military links to economic and cultural connections have especially been in the limelight of such riveting inquisitiveness which has often given rise to a flurry of rash comments sensational claims and impetuous conclusions But a detached probe into critical developments involving Iran and China however elucidates this rather inconvenient eventuality that the relations between the two important countries are not essentially based on pivotal principles and clear cut commitments nor do their ties really rest on tenuous thoughts and flimsy foundations devoid of any common interests in short term or well conceived objectives in long run In the same way the two political systems in Tehran and Beijing may ultimately end up each contributing to a separate pole of power regionally and internationally rather than moving faithfully and steadfastly in lockstep with what it requires them to truly materialize their more recent aspiration and design to move toward achieving a very close strategic partnership **Population in China** Nancy E. Riley,2016-12-16

China is home to a fifth of the worlds inhabitants For the last several decades this huge population has been in flux fertility has fallen sharply mortality has declined and massive rural to urban migration is taking place The state has played a direct role in these changes seeing population control as an important part of its intention to modernize the country In this insightful new work Nancy E Riley argues that Chinas population policies and outcomes are not simply imposed by the state onto an unresponsive citizenry but have arisen from the social organization of China over the past sixty years Riley demonstrates how Chinas population and population policy are intertwined and interact with other social and economic features Riley also examines the unintended consequences of state directives including the extraordinary number of missing girls the rapid aging of the population and an increase in inequality particularly between rural and urban residents Ultimately Chinas demographic story has to be understood as a complex multi pieced phenomenon This book will be essential

reading for researchers and students of China and social demography as well as non specialists interested in the changing nature of China's population *China's Strategic Intentions and Goals* United States. Congress. House. Committee on Armed Services, 2000 *Digest; Review of Reviews Incorporating Literary Digest*, 1927 **Global Economy and World Order in the Post-COVID-19 Era** Zhao Jianying, 2023-09-08 This volume is jointly written by twenty experts and scholars from China. It aims to reflect and answer at least two kinds of questions from historical experience and academic perspective: First, how to view the world in the post pandemic era; Second, how to view China in the post pandemic era. From the perspective of macroeconomics and international relations, the book discusses in detail the trend of economic globalization, the risk of global economic recession, the industrial chain affected by the COVID-19 pandemic, the world order in the post pandemic era, global governance and relations between and among major world powers. This book presents Chinese scholars in depth and timely reflections on the international pattern of the post pandemic era. It will be a great read for students and scholars of international relations, East Asian studies, and those interested in the world economy in general. *Pratiyogita Darpan*, 2008-08 Pratiyogita Darpan monthly magazine is India's largest read General Knowledge and Current Affairs Magazine. The Northeastern India as a region is landlocked, sharing most of its boundary with neighbouring countries of South and South East Asia. It empirically explores the progress in and prospects for trade, investment, and connectivity between Northeast India and Southeast Asian countries. Further, it discusses a range of regional and sub-regional multilateral initiatives, e.g., the Bay of Bengal Initiative for Multi-Sectoral Technical and Economic Cooperation (BIMSTEC), Bangladesh-China-India-Myanmar (BCIM), and Mekong-Ganga Cooperation (MGC) that could potentially strengthen the cooperation between Northeast India and neighboring regions in the social, cultural, and economic spheres. **The Rage of Nations** Edward R.
