Looking At China

John Elliot Bingham

Looking At China:

Looking for Balance Steve Chan, 2013-07-15 Debate surrounding China's rise and the prospects of its possible challenge to America's preeminence has focused on two questions whether the United States should contain or engage China and whether the rise of Chinese power has inclined other East Asian states to balance against Beijing by alignment with the United States or ramping up their military expenditures By drawing on alternative theoretic approaches most especially balance of threat theory political economic theory and theories of regime survival and economic interdependence Steve Chan is able to create an explanation of regional developments that differs widely from the traditional strategic vision of national interest He concludes that China's primary aim is not to match U.S. military might or the foreign policy influence that flows from that power and that its neighbors are not balancing against its rising power because in today's guns versus butter fiscal reality balancing policies would entail forfeiting possible gains that can accrue from cooperation economic growth and the application of GDP to nonmilitary ends Instead most East Asian countries have collectively pivoted to a strategy of elite legitimacy and regime survival based on economic performance **China** Walter F.
