10 Forces that Will Cure America's Health Crisis identifies and describes five top down macro forces and five bottom up market forces that have sufficient strength to transform the U S healthcare industry from the outside in. The powerful macro forces are demographic determinants, funding fatigue, chronic pandemics, technological imperatives, and pro consumer market reforms. The equally powerful market forces are whole health care redesign, care migration, aggregators, advantage, and empowered caregivers. Written by David Johnson and Paul Kusserow, professional healthcare advisors operating at the intersection of healthcare economics, policy, strategy, and capital formation, this book provides expert insight on how the U S healthcare system is becoming cheaper, better, more balanced between prevention and treatment, easier to access, and more empowering for both frontline caregivers and consumers. In this book, readers will learn about factors leading to rising healthcare costs, including an aging population, perverse economic incentives, armies of middlemen, and expensive breakthrough therapies. U S healthcare, in comparison to other high income countries, is twice as expensive per capita and inferior in terms of health status metrics. Similarities between the U S automobile industry crisis in the 1980s and today's adapt or die situation for healthcare providers and suppliers are explored. How the healthcare industry is reorganizing to decentralize delivery of whole person health in ways that will improve health outcomes and overall societal health. The Coming Healthcare Revolution is a must read for professionals and organizations seeking to understand and react to the paradigm shifting forces revolutionizing the healthcare ecosystem.
