Looking To Learn Visual Pedagogy At The University Of Chicago:

The Practice of Persuasion Keith Moxey, 2018-08-06 This sequel to *The Practice of Theory* stresses the continued need for self reflective awareness in art historical writing Offering a series of meditations on the discipline of art history in the context of contemporary critical theory Moxey addresses such central issues as the status of the canon the nature of aesthetic value and the character of historical knowledge The chapters are linked by a common interest in even fascination with the paradoxical power of narrative and the identity of the authorial voice Moxey maintains that art history is a rhetoric of persuasion rather than a discourse of truth Each chapter in *The Practice of Persuasion* attempts to demonstrate the paradoxes inherent in a genre that while committed to representing the past must inevitably bear the imprint of the present In Moxey's view art history as a discipline is often unable to recognize its status as a regime of truth that produces historically determined meanings and so continues to act as if based on a universal aesthetic foundation His new book should enable art historians to engage with the past in a manner less determined by tradition and more responsive to contemporary values and aspirations

Willows, Richard Kruk, Evelyne Corcos, 2012-12-06 Over the last 25 years reading processes have been the focus of an enormous amount of research in experimental psychology as well as in other disciplines The theories and models emerging from this research have greatly advanced understanding of both normal acquisition and of reading disabilities Although great progress has been made there are certain aspects that have been relatively neglected in the current understanding Specifically the role of visual factors has received less attention than that of other component processes This is particularly surprising since reading and writing are distinct from the other language processes of speaking and listening in large part by virtue of the fact that a visual dimension is involved Relevant research is broadly scattered both geographically and in terms of disciplines and there have been no major reviews or books concerned with the visual dimension of reading and reading disabilities The purpose of this book is to bring together a broad range of evidence that concerns the role of visual information in reading and reading disabilities Because reading processes are of central interest to cognitive scientists neuropsychologists psycholinguists clinicians and educators this book should draw a very broad readership Researching Risk and Uncertainty Anna Olofsson, Jens O. Zinn, 2018-09-27 Understanding and managing risk and uncertainty is a central task in contemporary societies characterised by rapid social technological and environmental change This book presents research approaches used by scholars who all share a passion to gain new insights in how individuals organisations and societies approach uncertain futures and their potential dangers The contributions illustrate the usefulness of particular methods and methodologies for researching risk in order to advance the understanding and management of social technological and environmental challenges With research strategies and approaches from sociology psychology history linguistics anthropology and gender studies Researching Risk and Uncertainty provides guidance and inspiration to students and scholars across a range of disciplines interested in risk disaster and social crisis
