Boswell Irma S. Lustig, 2021-11-21 These eleven original essays by well known eighteenth century scholars five of them editors of James Boswell s journal or letters commemorate the bicentenary of Boswell s death on May 19 1795 The volume illuminates both the life and the work of one of the most important literary figures of the age and contributes significantly to the scholarship on this rich period In the introduction Irma S Lustig sets the tone for the volume She reveals that the essays examining Boswell as Citizen of the World are deliberately paired with those that analyze his artistic skills to emphasize that Boswell s sophistication as a writer is inseparable from his cosmopolitanism The essays in Part I focus on the relationship of the Enlightenment at home and abroad to Boswell s personal development Marlies K Danziger restores to significant life the continental philosophers and theologians Boswell consulted in his search for religious certainty Peter Perreten examines Boswell s enraptured study of Italian antiquity and his responses to the European landscape Richard B Sher and Perreten document the personal and aesthetic influence of Henry Home Lord Kames Scottish jurist and leading Enlightenment figure on Boswell Michael Fry discusses Boswell s relationship with Henry Dundas political manager for Scotland and Thomas Crawford examines Boswell s long standing interest in the volatile political issues of the period including the French Revolution through his correspondence with William Johnson Temple In evaluation Boswell s performance as Laird of Auchinleck John Strawhorn documents his efforts to improve the estate by use of new agricultural methods The essays in Part II study aspects of Boswell s artistry in Life of Johnson the magnum opus that set a standard for biography Carey McIntosh examines Boswell s use of rhetoric and William P Yarrow offers a close scrutiny of metaphor Isobel Grundy invokes

Virginia Woolf in demonstrating Boswell's acceptance of uncertainty as a biographer John B Radner reveals Boswell's self assertive strategies in his visit with Johnson at Ashbourne in September 1777 and finally Lustig examines as a subplot of the biography Johnson's patient efforts to win the friendship of Margaret Montgomerie Boswell An appendix by Hitoshi Suwabe serves scholars by providing the most exact account to date of Boswell's meetings with Johnson *Community of the College of Justice* John Finlay, 2012-08-10 The first institutional history of Scotland's 18th century civil court and its legal community This study investigates the important role of Scotland's College of Justice members in the cultural and economic flowering of Scotland as a whole and Edinburgh in particular and argues that a single Law institution had a marked influence on the Scottish cultural landscape to the present day The Court of Session records uncovered by John Finlay show a cross section of Scottish society experiencing Edinburgh's legal processes in the 18th century 18th century Edinburgh owed much to the men who worked in the Court of Session as members of the unique institution known as the College of Justice James Boswell Lord Kames Henry Dundas and Walter Scott are just some of those who emerged from the College to influence Scotland's place in Europe *Scottish Society, 1707-1830* Christopher A. Whatley, 2000 This book challenges conventional wisdom and provides new insights into Scottish social and economic history Christopher A Whatley argues that the Union of 1707 was vital for Scottish success but in ways which have hitherto been overlooked He proposes that the central place of Jacobitism in the historiography of the period should be revised Comprehensive in its coverage the book is based not only on an exhaustive reading of secondary material but also incorporates a wealth of new evidence from previously little used or unused primary sources **The Cambridge History of Eighteenth-century Philosophy** Knud Haakonssen, 2006 This two volume set presents a comprehensive and up to date history of eighteenth century philosophy The subject is treated systematically by topic not by individual thinker school or movement thus enabling a much more historically nuanced picture of the period to be painted *The Language of Mineralogy* Matthew D. Eddy, 2016-12-05 Classification is an important part of science yet the specific methods used to construct Enlightenment systems of natural history have proven to be the b te noir of studies of eighteenth century culture One reason that systematic classification has received so little attention is that natural history was an extremely diverse subject which appealed to a wide range of practitioners including wealthy patrons professionals and educators In order to show how the classification practices of a defined institutional setting enabled naturalists to create systems of natural history this book focuses on developments at Edinburgh's medical school one of Europe's leading medical programs In particular it concentrates on one of Scotland's most influential Enlightenment naturalists Rev Dr John Walker the professor of natural history at the school from 1779 to 1803 Walker was a traveller cleric author and advisor to extremely powerful aristocratic and government patrons as well as teacher to hundreds of students some of whom would go on to become influential industrialists scientists physicians and politicians This book explains how Walker used his networks of patrons and early training in chemistry to become an eighteenth century naturalist Walker's

mineralogy was based firmly in chemistry an approach common in Edinburgh s medical school but a connection that has been generally overlooked in the history of British geology By explicitly connecting eighteenth century geology to the chemistry being taught in medical settings this book offers a dynamic new interpretation of the nascent earth sciences as they were practiced in Enlightenment Britain Because of Walker s influence on his many students the book also provides a unique insight into how many of Britain s leading Regency and Victorian intellectuals were taught to think about the composition and structure of the material world
