Ruderman,1988 In describing the career of Abraham Yagel a Jewish physician kabbalist and naturalist who lived in northern Italy from 1553 to about 1623 David Ruderman observes the remarkable interplay between early modern scientific thought and religious and occult traditions from a wholly new perspective that of Jewish intellectual life Whether he was writing about astronomical discoveries demons marvelous creatures and prodigies of nature the uses of magic or reincarnation Yagel made a consistent effort to integrate empirical study of nature with kabbalistic and rabbinic learning Yagel s several interests

were united in his belief in the interconnectedness of all things a belief shared by many Renaissance thinkers that turns natural phenomena into signatures of the divine unity of all things Ruderman argues that Yagel and his coreligionists were predisposed to this prevalent view because of occult strains in traditional Jewish thought He also suggests that underlying Yagel's passion for integrating and correlating all knowledge was a powerful psychological need to gain cultural respect and acceptance for himself and for his entire community especially in a period of increased anti-Semitic agitation in Italy Yagel proposed a bold new agenda for Jewish culture that underscored the religious value of the study of nature reformulated kabbalist traditions in the language of scientific discourse so as to promote them as the highest form of human knowledge and advocated the legitimate role of the magical arts as the ultimate expression of human creativity in Judaism This portrait of Yagel and his intellectual world will well serve all students of late Renaissance and early modern Europe

Unicorns
Stephanie Nichole Small, 2020-10-09 The unicorn is one of the oldest mythological beings It has traveled through lore as a single horned bull antelope horse dragon and many other manifestations It has been throughout Asia Europe the Americas and further it has pranced through tapestries bestiaries sculptures paintings and more It has been found on cave walls and has been featured in modern movies It is easy to say that the unicorn is one of the most popular legendary creatures and its popularity can only grow Unicorns vary in appearance but commonly are a single horned white horse They are usually equipped with a lion's tail beard and tufted legs The unicorn has been described as small as a cat or as vast as a skyscraper The unicorn has been a symbol of gods demons witches Jesus and nearly every other archetype it seems To me the unicorn is the Horned God or it is the sliver of the moon whose sharp new moon shape is the sharpened horn The unicorn is Artemis Demeter Pan it is the horse the child the fae Many people think that you need to be a virgin in order to draw a unicorn This is primarily a Christian concept and although its origins are questionable from what my research has been able to tell me it is contradictory to the original unicorn idea The unicorn may only come to those who are pure of intention and possess a virtue beyond that the body can hold It has normally been a divine being of goodness however that also has changed over the years The unicorn first appeared in mythology 3000 BCE in China and there were active sightings up until 1820 Although many people these days attest to seeing the magnificent creature they are often ignored or discredited It is a creature of inspiration and power for people everywhere This book discusses the unicorn lore and magic as well as energy use

Logical Fictions in Medieval Literature and Philosophy

Virginie Greene, 2014-10-23 In the twelfth and thirteenth centuries new ways of storytelling and inventing fictions appeared in the French speaking areas of Europe This new art still influences our global culture of fiction Virginie Greene explores the relationship between fiction and the development of neo Aristotelian logic during this period through a close examination of seminal literary and philosophical texts by major medieval authors such as Anselm of Canterbury Ab lard and Chr tien de Troyes This study of Old French logical fictions encourages a broader theoretical reflection about fiction as a universal human trait and a defining element of the history of Western philosophy and literature Additional close readings of classical Greek philosophers Plato and Aristotle and modern analytic philosophy including the work of Bertrand Russell and Rudolf Carnap demonstrate peculiar traits of Western rationalism and expose its ambivalent relationship to fiction
