Losing a Parent to Suicide Marty Loy, Amy Boelk, 2013-09-05 The suicide of a parent has life long consequences few more traumatic scenarios exist and counselors often struggle for ways to help clients deal with its effects Few understand the pain and life altering effects of these tragedies better than children who have experienced the suicide of a parent Despite this there are few texts that incorporate and evaluate the first person accounts of grief following a suicide while advancing a method for helping Losing a Parent to Suicide analyzes stories of parent suicides and explores the grief and coping processes that follow discovering the strategies methods and modes of therapy that have empowered grieving individuals and helped them rebuild their lives

Overlooked LaVerne Hanes Collins, 2023-12-06 American treatment systems overlook some of the most salient issues in Black mental health The global social justice movement brought attention to obvious issues but all challenges of living Black are not obvious Much remains deeply embedded in overlooked historical factors overlooked identity issues overlooked clinical bias overlooked losses and overlooked strengths LaVerne Collins brings those unspoken issues of Black life to the forefront of counseling conversations The author looks deep into Black identities and unhides the psychological impact of Black racialization The book considers the emotional weight of the historical presumption of guilt and the impact of shorter lifespans Collins unearths the hidden sorrow disenfranchised grief and ambiguous losses imposed by racism Each chapter brings overlooked and unspoken considerations into view helping counselors develop culturally sensitive case conceptualizations and interventions The book invites counselors to reverse the deficit narratives associated with Black families Black resistance and the Black Church and see these as overlooked strengths

The Deceased-focused Approach to Grief Frank E. Eyetsemitan, 2022-04-22 Conventional grief models focus on the bereaved including actions that they need to take to get back to normalcy following the death of a loved one This book suggests that it might be helpful in the grieving process to focus on the deceased instead Research points to the benefits of altruistic acts and thoughts including improvements in mood Altruistic acts and thoughts also could be extended to the deceased who in death has experienced a loss as well By taking on the perspective of and being empathic toward the deceased a response shift occurs that could result in mood improvement and happiness in the bereaved The book provides guidelines for this alternative grief model in the death of a child of a teenager of a spouse partner and of a

sibling and in multiple deaths and in persistent grief experience among others Based on motivational principles a workbook is also provided for monitoring progress in coping with bereavement Comprehension questions and additional readings are provided in each chapter to help the reader further explore the topic at hand This book would be useful in a course on death dying and bereavement to healthcare practitioners bereavement counsellors and to scholars in death dying and bereavement across different fields including psychology sociology social work public health and religion Most grief models focus on the bereaved including actions the survivor needs to take to get back to normalcy after a loss However in the grieving process it might be helpful if attention is shifted to the deceased instead The bereaved by doing things she or he perceives as pleasing to the deceased might receive healing and satisfaction in return Lisa Farino 2010 notes that there is no shortage of research pointing to the beneficial effects of focusing on others In a study by Carolyn Schwartz and Rabbi Meir Sender 1999 lay people with a chronic disease were trained to provide compassionate unconditional regard to others who had the same illness The results showed that the providers of care and compassion reported better quality of life than the recipients of care and compassion even though both givers and receivers had the same disease The givers showed profound improvements in confidence self awareness self esteem depression and in role functioning The researchers emphasized the beneficial importance of response shift the shifting of internal standards values and concept definition of health and well being in dealing with one's own adversity Farino 2010 notes that this research is profound because in western culture the belief is that feeling happy tends to be getting something for yourself There are biological origins to the notion that it's better to give than to receive Using the functional magnetic resonance imaging fMRI researchers were able to demonstrate a connection between brain activity and giving People who gave voluntarily and also for a good cause experienced more activation of the part of brain that controls for pleasure and happiness e.g. Harbaugh Mayr Burghart 2007 Studies show that about 7% of the US population experience complicated or prolonged grief disorder e.g. Kersting et al 2011 This is persistent grief that does not go away and many parents tend to experience this after the loss of a child In their study Catherine Rogers and colleagues 2008 found bereaved parents reporting more depressive symptoms poorer well being and more health problems after a child's loss almost 20 years later Survivors usually show concern about how their deceased loved ones felt prior to death and if happy or not in the afterlife e.g. Eyetsemitan Eggleston 2002 A study reported respondents used emotion discrete terms such as sad happy or angry to describe the faces of deceased persons The researchers suggested that the perceived emotional state of a deceased loved one could impact on the survivor's mourning trajectory e.g. Eyetsemitan Eggleston 2002 The bereavement model of placing focus on the deceased instead provides an alternative to existing bereavement models in helping the survivor to cope with a loss

Ethical Practice in Early Childhood Ioanna Palaiologou, 2012-07-25 Ethical considerations are raising new questions about the involvement and participation of children in research By considering the ethical issues that can arise when working with and doing research with young children from birth to five years this book

examines a wide range of topics including involving young children in research informed consent research tools with children under five researching children with special needs researching vulnerable groups researching other cultures multi agency working loss and bereavement ethical practices when studying early childhood safe guarding young children inspection ethics and leadership Examples from education health and social work are examined and there are chapter overviews activities case studies points for discussion and recommendations for further reading and useful Websites in each chapter which help to engage the reader and facilitate critical thinking and reflective practice This is a comprehensive guide to a developing field for the early years student and practitioner *Zero to Three* ,2006 Handbook of Death and Dying Clifton D. Bryant,2003-10 Dying is a social as well as physiological phenomenon Each society characterizes and consequently treats death and dying in its own individual ways ways that differ markedly These particular patterns of death and dying engender modal cultural responses and such institutionalized behavior has familiar economical educational religious and political implications The Handbook of Death and Dying takes stock of the vast literature in the field of thanatology arranging and synthesizing what has been an unwieldy body of knowledge into a concise yet comprehensive reference work This two volume handbook will provide direction and momentum to the study of death related behavior for many years to come Key Features More than 100 contributors representing authoritative expertise in a diverse array of disciplines Anthropology Family Studies History Law Medicine Mortuary Science Philosophy Psychology Social work Sociology Theology A distinguished editorial board of leading scholars and researchers in the field More than 100 definitive essays covering almost every dimension of death related behavior Comprehensive and inclusive exploring concepts and social patterns within the larger topical concern Journal article length essays that address topics with appropriate detail Multidisciplinary and cross cultural coverage The Psychiatric Interview in Clinical Practice, Third Edition Roger A. MacKinnon, M.D.,Robert Michels, M.D.,Peter J. Buckley, M.D.,2015-10-20 Much has changed in the critical interval since the last edition of The Psychiatric Interview in Clinical Practice was published This new third edition provides an up to date examination of the psychiatric interview that reflects changes introduced in DSM 5 while continuing to recognize that describing symptoms and establishing a diagnosis should command only a portion of the clinician s attention and that a patient s personal history must be elicited and character structure addressed in the clinical engagement Significant advances have been made in biological psychiatry and research in genetics cognitive neuroscience psychopharmacology brain imaging and the neurosciences in general continues apace informing the culture of psychiatry and providing growing insight into the etiology of mental illnesses However the book reflects the authors belief that virtually all major psychiatric disorders are complex amalgams of genetic disposition and environmental influences In this context the psychiatric interview is a vitally important dialogue and effective strategies are modeled through the use of clinical vignettes taken from the authors experience Topics and features of this new edition include An updating of diagnostic considerations to reflect the publication of DSM 5 A chapter on

interviewing the patient with dissociative identity disorder DID which is now recognized as an entity distinct from other psychopathological conditions and rooted in childhood trauma The frequency of DID in the ambulatory setting has been repeatedly demonstrated and speaks to the need to accurately diagnose and treat this often debilitating disorder An entirely updated chapter on interviewing the traumatized patient A section on interviewing the patient of different background The book emphasizes that the subjective experience of being different is universal and that psychiatry is enriched by recognizing and exploring that experience validating its existence and attempting to understand how it influences the patient s life Continued emphasis on and inclusion of relevant case vignettes drawn from the authors clinical experiences Structural consistency across chapters with sections on psychopathology and psychodynamics differential diagnosis management of the interview transference and countertransference and so forth which reinforces skills acquisition and makes the text easy to use By creating a text that is aligned with DSM 5 while continuing to stress the importance of eliciting the patient s subjective experience and achieving a therapeutic dialogue the authors of *The Psychiatric Interview in Clinical Practice* have done a great service to the profession and provided much needed guidance to mental health clinicians and trainees What Forever Means After the Death of a Child Kay Talbot, 2013-05-13 List of Tables List of Figures Series Editor s Foreword Preface Prologue Acknowledgements What It Means to Be a Parent After a Child Had Died The Mothers Now Childless Study Research Design and Findings When a Child Dies Does Grieving Ever End One Death A Thousand Strands of Pain Finding the Meaning of Suffering Bereaved Parents Search for Understanding The Paradox of Healing Confronting a Spiritual Crisis Where is God When Bad Things Happen Confronting an Existential Crisis Can Life Have Purpose Again Deciding to Survive Reaching Bottom Climbing Up Remembering With Love Bereaved Parents as Biographer Reaching Out to Help Others Wounded Healers Reinventing the Self Parents Ask Who Are We Now The Legacy of Loss References Resources Appendices Index **The Pulse of Praise** Julia Carolyn Guernsey, 1999 Guernsey draws on D W Winnicott s object relations model which focuses on self development in a relational context to illuminate various senses of self and Other that Herbert s poems express discursively and formally The book will appeal not only to Herbert scholars and other Renaissance critics but also to audiences interested in psychoanalysis and how it relates to literature religion culture and poetics BOOK JACKET
