Montr al Reykjavik Sacramento and Turku It shows that in all countries the act of resisting school is more likely to occur among the socio economically disadvantaged and those in the most disadvantaged schools However educational system features including tracking free school choice and school autonomy are important driving factors of the differences between schools As such systems have the tools to curb between school differences in resistance Previous research turns resistance into a problem of individual students However if school or system features engender resistance to school policy initiatives directed at individual students may solve the problem only partially

This book is a collection of essays, case studies, and guidelines that describe the demography, philosophical, medical, legal, and developmental framework in which these youth and health care staff confront medical decision making. The authors address questions of consent, confidentiality, access to care, and the right to refuse or demand care. Throughout, the emphasis is on the real world.
