Koch, 2021-06-23 This book traces the origin of the legend of El Dorado and the various expeditions that set out to locate that mysterious land of untold wealth in South America Motivated by both fanciful rumors of a golden city ruled by a man who coated himself daily with gold dust and the more practical allure of a region abundant in cinnamon trees a spice that was worth its weight in gold to Europeans many conquistadors convinced themselves that another native empire awaited their conquest These quests for fortune and glory would lead to an encounter with fierce female warriors who were believed to be the Amazons of ancient Greek lore and the discovery of the mighty river later named for the legendary Amazon tribe The first half of this book details the lesser known accounts of German interest in locating the wealth of a golden kingdom called Xerira and an elusive passage at Venezuela's Lake Maracaibo which supposedly led to the Pacific Ocean The second section focuses on the various Spanish efforts to discover El Dorado each of which was eventually doomed to despair disappointment and death *The Oxford Handbook of Prehistoric Figurines* Timothy Insoll, 2017 The Oxford Handbook of Prehistoric Figurines is the first text to offer a comparative survey of figurines from across the globe bringing together myriad contemporary research approaches to provide invaluable insights into their function context meaning and use as well as past

Nurturing Doubt Elmer S. Miller,1995 Unique in ethnography Nurturing Doubt documents the transforming effects of field experiences on a young Mennonite who went to Argentina to work with the Toba first as a missionary and later as an anthropologist Elmer Miller insightfully probes the documents diaries field journals and letters of both his lives revealing as he does the ways in which his perceptions of the Toba and theirs of him changed when his role changed Deeply affected by an upbringing in which he had been taught that doubting was sinful Miller gradually found that he doubted not only the validity of the missionary mandate but also his ethnographic mandate and the whole practice of anthropology His exploration of how his doubt was transformed from a negative activity into a positive philosophical attitude underscores the richness of his relationships with the Toba In depicting the move from theological to anthropological discourse Miller contributes to current debates over the form and purpose of ethnographic investigation and reporting

Modern Egyptian Art, 1910-2003 Liliane Karnouk,2005 From the early years of the twentieth century with the rejection of European political and cultural domination in Europe modern artistic expression in Egypt was influenced by and often reflected the country s growing national consciousness In the years following the 1952 revolution wealthy patrons of the arts disappeared from Egypt s cosmopolitan art world and were replaced by the state which by the 1960s exercised full control over all cultural activities including the arts In the 1990s as elsewhere throughout the world Egyptian art was affected by general shifts in culture brought about by globalization The disruption of a sense of place and feelings of belonging were a response to the influx of the challenging and at times disquieting information available to whole cultures and communities through new media Examining the work of over 70 artists from 1910 until the present day Liliane Karnouk traces the parallel steps of modern Egyptian art and the social and political environment in which that art was and continues to be created Fully illustrated with over 280 color and black and white illustrations this comprehensive volume is both a feast

for the eyes and a mine of information for artists and non specialists alike **Shadow Empires** Thomas J. Barfield, 2025-12-02 An original study of empire creation and its consequences from ancient through early modern times The world's first great empires established by the ancient Persians Chinese and Romans are well known but not the empires that emerged on their margins in response to them over the course of 2 500 years These counterempires or shadow empires which changed the course of history include the imperial nomad confederacies that arose in Mongolia and extorted resources from China rather than attempting to conquer it as well as maritime empires such as ancient Athens that controlled trade without seeking territorial hegemony In Shadow Empires Thomas Barfield identifies six kinds of counterempire and explores their rise politics economics and longevity What all these counterempires had in common was their interactions with existing empires that created the conditions for their development When highly successful these counterempires left the shadows to become the world's largest empires for example those of the medieval Muslim Arabs and of the Mongol heirs of Chinggis Khan Three former shadow empires Manchu Qing China Tsarist Russia and British India made this transformation in the late eighteenth century and came to rule most of Eurasia However the DNA of their origins endured in their unique ruling strategies Indeed world powers still use these strategies today long after their roots in shadow empires have been forgotten Looking afresh at the histories of important types of empires that are often ignored Shadow Empires provides an original account of empire formation from the ancient world to the early modern period
