Leading writers including Raymond Benson, J. A. Konrath, Raelynn Hillhouse, and John Cox discuss the ten sexiest Bond girls, the best villains, and the controversy surrounding the latest actor to play James Bond. Topics covered range from the playful how to build a secret lair and avoid the perennial mistakes made by would-be world dominators to the thought provoking such as Bond's place in the modern world, his Oedipal tendencies, and perceived misogyny, and the unerring allure of the charming spy Television Jeremy G. Butler, 2012-02-20 For nearly two decades *Television: Critical Methods and Applications* has served as the foremost guide to television studies. Designed for the television studies course in communication and media studies curricula, *Television* explains in depth how television programs and commercials are made and how they function as producers of meaning. Author Jeremy G. Butler shows the ways in which camera, style, lighting, set design, editing, and sound combine to produce meanings that viewers take away from their television experience. He supplies students with a whole toolbox of implements to disassemble television and read between the lines, teaching them to incorporate critical thinking into their own television viewing. The fourth edition builds upon the pedagogy of previous editions to best accommodate current modes of understanding and teaching television. Highlights of the fourth edition include a new chapter and part organization to reflect the current approach to teaching television with greatly expanded methods and theories, chapters on modes of production and their impact on what you see on the screen, discussions integrated throughout on the latest developments in television's on-going convergence with other media such as material on transmedia storytelling and YouTube's impact on video distribution. Over three hundred printed illustrations, including new and better quality frame grabs of recent television shows and commercials. A companion website featuring color frame grabs, a glossary, flash cards, and editing and sound exercises for students as well as PowerPoint presentations, sample syllabi, and other materials for instructors. Links to online videos that support examples in the text are also provided. With its distinctive approach to examining television, *Television* is appropriate for courses in television studies, media criticism, and general critical studies.
