Cerulo,Janet M. Ruane,2022-06-21 How social status shapes our dreams of the future and inhibits the lives we envision for ourselves Most of us understand that a person's place in society can close doors to opportunity but anything is possible when we dream about what might be or so we think *Dreams of a Lifetime* reveals that what and how we dream and whether we believe our dreams can actually come true are tied to our social class gender race age and life events Karen Cerulo and Janet Ruane argue that our social location shapes the seemingly private and unique life of our minds We are all free to dream about possibilities but not all dreamers are equal Cerulo and Ruane show how our social position ingrains itself on our mind's eye quietly influencing the nature of our dreams

whether we embrace dreaming or dream at all and whether we believe that our dreams from the attainable to the improbable can become realities They explore how inequalities stemming from social disadvantages pattern our dreams for ourselves and how sociocultural disparities in how we dream exacerbate social inequalities and limit the life paths we believe are open to us Drawing on a wealth of original interviews with people from diverse social backgrounds Dreams of a Lifetime demonstrates how the study of our dreams can provide new avenues for understanding and combatting inequality including inequalities that precede action or outcome

*Let Your Body Interpret Your Dreams* Eugene T. Gendlin, 1986 A Profound Method to Work with Dreams In research at the University of Chicago Dr Gendlin found that certain specific bodily responses can open up and lead to small steps of a new experience These bodily responses can

indicate the steps for interpreting a dream Theories about dreams differ and give contradictory interpretations Dr Gendlin derives 16 questions from the many existing theories to aid you the dreamer in the process of interpretation In this book Dr Gendlin teaches you to ask the questions so that your body can respond You learn to recognize how it feels when a question is about to lead to a breakthrough You learn to let the question complete itself so that the dream opens and you know without doubt what it is about The first stage is learning what the dream is about But this alone may not yet tell you anything you did not know before The second stage is getting something new from the dream for your own development The BIAS CONTROL solves what was until now an insurmountable problem People could not interpret their own dreams because they always imposed their usual biases on them The BIAS CONTROL shows you how to open yourself to a new step Eugene T Gendlin Ph D is Professor of Psychology at the University of Chicago He has written books and articles in philosophy and psychology His work has been translated into more than seven languages He was for many years the editor of Psychotherapy Theory Research and Practice In 1970 he was chosen by the Psychotherapy Division of the American Psychological Association for their first Distinguished Professional Psychologist of the Year Award
