Mexican Tailless Amphibians in the United States National Museum (Classic Reprint) Remington Kellogg, 2015-07-16 Excerpt from *Mexican Tailless Amphibians in the United States National Museum* Upon completion of field work by the Death Valley expedition and the consequent disbanding of the party at Visalia Tulare County Calif the various members scattered to take up other assignments Doctor Nelson traveled southward through the San Joaquin Valley to the Goldman ranch at Alila now Earlimart Calif where he mentioned to E A Goldman s father his intention of obtaining an assistant The father spoke of his son s interest in natural history and remarked that he was then in Fresno As a result of this conversation the senior Goldman went to Fresno and brought Edward back with him to the ranch for Nelson s appraisal On October 10 1891 Goldman left his father s ranch as Nelson s personal assistant the understanding being that he was to be given 30 a month and his board This was paid by Nelson out of his own salary of 150 a month They traveled in a buckboard outfit which was the object of no little curiosity because of two 42 pound bear traps that hung one from each side For some reason Nelson had chosen the name Scalops for one member Of their team while the other went by the name of Johnny Nelson and Goldman drove through the southern end of the San Joaquin Valley to a site 8 miles west of Tejon Pass and thence to the head of San Emigdio Canyon Leaving this camping site they crossed the southern end of the valley collecting at various localities on their northward trip to San Luis Obispo Calif From this place they worked northward to San Simeon and the mountains near by and in a few days drove southward along the coast collecting sea birds particularly to Santa Paula where about January 4 1892 they abandoned the buckboard and field outfit About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

Amphibians and Reptiles of the US-Mexico Border States/Anfibios y reptiles de los estados de la frontera México-Estados Unidos Julio A. Lemos-Espinal, 2015-11-02 In the first bilingual work on the reptiles and amphibians of the US Mexico border top

herpetologists come together to describe the herpetofauna of the states of this region which includes more than 600 species of toads frogs salamanders turtles sea turtles alligators lizards snakes and sea snakes that are found along the almost 2 000 mile border between the two countries Each chapter is devoted to one state four in the US California Arizona New Mexico and Texas and six in Mexico Baja California Sonora Chihuahua Coahuila Nuevo Le n and Tamaulipas with text in both English and Spanish The chapters contain an introduction to the area a review of the research a sketch of the state s physiography and a description of the species present as well as the pertinent conservation issues they face A color photo gallery includes images of nearly all species Almost 40 percent of the featured native species are shared between the US and Mexico reminding us that animals depend on the integrity of natural landscapes and proving the need for a comprehensive bilingual reference to help lead a shared effort in the management and conservation of the borderlands **Mexican Tailless**

Proceedings of the United States National Museum United States National Museum,1954 **The Eponym Dictionary of Amphibians** Bo Beolens,Michael Watkins,Michael Grayson,2013-04-22 New species of animal and plant are being discovered all the time When this happens the new species has to be given a scientific Latin name in addition to any common vernacular name In either case the species may be named after a person often the discoverer but sometimes an individual they wished to honour or perhaps were staying with at the time the discovery was made Species names related to a person are eponyms Many scientific names are allusive esoteric and even humorous so an eponym dictionary is a valuable resource for anyone amateur or professional who wants to decipher the meaning and glimpse the history of a species name Sometimes a name refers not to a person but to a fictional character or mythological figure The Forest Stubfoot Toad *Atelopus farci* is named after the FARC a Colombian guerrilla army who found refuge in the toad s habitat and thereby it is claimed protected it Hoipollo s Bubble nest Frog *Pseudophilautus hoipolloi* was named after the Greek for the many but someone assumed the reference was to a Dr Hoipollo Meanwhile the man who has everything will never refuse an eponym Sting s Treefrog *Dendropsophus stingi* is named after the rock musician in honour of his commitment and efforts to save the rainforest Following the success of their Eponym Dictionary of Reptiles the authors have joined forces to give amphibians a similar

treatment They have tracked down 1 609 honoured individuals and composed for each a brief pithy biography In some cases these are a reminder of the courage of scientists whose dedicated research in remote locations exposed them to disease and even violent death The eponym ensures that their memory will survive aided by reference works such as this highly readable dictionary Altogether 2 668 amphibians are listed *Amphibians of Western , Monthly Catalogue, United States Public Documents ,1932 Report on the Progress and Condition of the U.S. National Museum for the Year Ending June 30 ...
