Gunti examines the antagonizing reactions to digital technologies in photography While Thomas Ruff Andreas Gursky and J
rg Sasse have gradually adopted digital imaging tools in the early 1990s other photographers from the D sseldorf School
have remained faithful to film based technologies By evaluating the aesthetic and discursive preconditions of this situation
and by extensively analyzing the digital work of these three photographers this book shows that the digital turn in
photography was anticipated by the conceptualization of images within systems and thus offers new perspectives for
understanding the digital revolution
