Africa's Quiet Revolution Observed from Nigeri Dominic Okereke, 2012-07 This book prescribes rapid revolution in principal sectors of this African economy through radical paradigm changes And the resultant comprehensive transformation will guarantee significantly higher productivities and double digit annual economic growth Included in this paradigm shift is the joint reindustrialization of the African economy and the US

ailing industries via a new Strategic trans Atlantic Alliance modeled on the balanced Euro US cooperation after World War II But it first takes readers through a thorough evaluation of the familiar subject corruption which haunts Nigeria the principal economy in the continent The fundamental difference with other texts on the subject is that this book identifies the most debilitating variant of that corruption That variant causes massive capital flight from a post colonial soft economy that is neither capitalist nor socialist The Nigerian corruption thrives on the native Philosophy of Commission hardened by intractable tribalism that coagulated and ossified with the imports substitution pattern preferred by European firms since independence The book then proceeds to earn its priced revolutionary credential by inventing very novel scientific methods that will skillfully turn this insidious source of structural rigidity and arrested development into a force for economic growth A new apex political leadership culture is recommended and to be fortified with a unifying lingua franca An inter ethnic marriage melting pot is advised for intensified nigerianization of Nigerian youths at birth Spiritual diversity is envisaged to significantly diminish religious intolerance and sectarian violence Modern bureaucracy and inward looking tourism are reformulated to reduce effervescent insecurity and minimize capital flight The resultant economic stability will enlarge domestic foreign investment inflow and will reverse the current dis industrialization and massive job loss and the conditions of under full employment Technological Functionalism Economic pan Africanism and the Alternative Policy of Inputs Substitution are among the several brand new blueprints that this book offers for the extensive transformation of Africa s economy into the robust emerging economy that will rival its counterparts in India and China in the immediate future
