Running On Instinct:

Run with the Wolves T c Tombs,2012-09-26 During the turbulent fifteenth century fearsome creatures roam the night and terrorize the countryside Willie a young Medinian serf was bitten during an attack on the farm livestock and now suffers from the same full moon affliction as his mentor Woodrow and the rest of the Pack As Willie moves from one moon cycle to the next he soon realizes that his fate has been changed forever While he attempts to adjust to his new life and uncertain future Lord Victor the king of Varakov is determined to provoke a war that threatens to destroy all who reside in Sanctuary Caught up in the midst of this dire situation Woodrow must decide whether to honor his sacred pledge to his dark master or stand in opposition and risk his wrath As the Hunters Moon arrives and the goddess Diana rises in the sky to lay claim to her children the Pack leader embarks on a dangerous trek to seek out the cavern of the Oracle Now only time will tell if the reclusive old sage holds the answers he desperately seeks Beware of the full moon This one is for all of the werewolf lovers Top Book Reviewers A well written and addictive first novel Blue Ink Review A well developed tightly plotted fantasy readers will want installments two and three Kirkus Reviews *Running On Instinct* N. Bastarache,2012-04 Language is so easily learned that children master it in the very early stages of life The expression of self through language is based in innate instincts but it must be learned It can be as simple as adding blocks together to spell words the only difference is that it consists of adding phonemes together These phonemes are derived from grunts and calls and are strung together to form words or Tilogos which are combined into sound clichs with definitive meaning In order to understand the evolution of language from calls and cries to modern articulation we must first understand how the most basic of guttural sounds was originally used to represent a species recognizable concept in the earliest stages of interpersonal communication From there we must strive to understand how these basic sounds are manipulated and strung together to create complex words with varying meaning representative of anything from items in one's surroundings to intangible thoughts and emotions At its heart Tilogos explores the question of how human beings have developed the ability to use simple noises to represent the most complex aspects of our shared world **The Police Journal** ,1917
