Rural Industrialisation In West Bengal:

Rural Industrialisation in West Bengal Pradip Kumar Biswas, 2003 This book analyses the pattern and basis of rural industrialisation in West Bengal. Existence of long tradition of crafts indigenous institutions of skill formation of trading of social and community networks of the petty producers helped a rapid growth of the industries given the favourable conditions created by the state in the 1970s and 1980s. Analysing the experience of England Japan and China the book identifies factors like slow growth of agriculture ineffective and often contradictory state policies of innovations and training incentives credit and reservation as being primarily responsible for the poor performance of the Indian rural industries. These problems notwithstanding West Bengal government's active role made a favourable impact on rural industries. The institutions such as master traders systems and cooperatives facilitated innovation and skill upgradation smooth adoption of improved technology promotion of new products. But due to overall change in the attitude and economic policy of the country towards free market without preparation at the ground level the rural industries start declining.

Indian Industrial Clusters Keshab Das, 2017-05-15 This book presents an in depth analysis of the functional dynamics of Indian industrial clusters which have grown and stayed as hubs of business activity in India thanks to a large calibrated domestic market for goods. The examples given contribute towards the understanding of theoretical underpinnings of small firm clusters in LDCs and also indicate steps towards effective policy making for SME development in general and local economic regeneration in LDCs in particular. The industries studied include modern as well as traditional artisanal sectors which span at least ten Indian states. They provide insights into informality labour inter firm relationship cooperation and competition technological and organisational flexibility and forms of supportive institutional arrangements and nature of linkages with agencies external to the cluster among other things. This book will be of particular interest to SME practitioners and to students and researchers of economics business management regional development economic geography industrial sociology and industrial organisation.

Socio-economic Study of Agro Industries Som Nath Sharma, 1992 *Indian Economy: Reforms and Development* Pradip Kumar Biswas, Panchanan Das, 2019-08-09 The book presents a comprehensive study of the impact of policy reforms on output employment and productivity growth across sectors of India since 1991. It showcases varied responses from different sectors as they faced different degrees of policy interventions and challenges or opportunities as regards markets technology and availability of skills and other complementary resources. The book also discusses the contributions of the service sector on India's GDP and employment. The book throws light on the phenomena of rising inequality and persistent poverty which continues to shadow and be a hallmark of post reform India despite high economic growth. It underlines the failure of these reforms to bring about major change in social and economic organizations and institutions. The book's contents stress on the criticality of addressing these issues as they have a serious potential of jeopardizing the country's ability to maintain high growth momentum. With these pertinent topics the book would be of

interest not only to the research community but also to policy makers and practitioners of various sectors addressed here

Micro and Small Enterprises in India Keshab Das, 2011-04-26 This book presents a set of analytical and deeply policy oriented articles on the dynamics of growth and performance of micro and small enterprises in India during the period of reforms. It provides fairly detailed analyses of policy changes for the micro and small enterprises sector as well as empirical analyses of performance and efficiency of the unorganised manufacturing sector. It examines a range of emerging and persistent complex issues facing this crucial sector including credit exports trade regulations capacity building subcontracting clustering entrepreneurship and rural industrialisation. Focusing on the constraints facing this sector even during the economic reforms, most of the articles analyse how and why special attention particularly by the state needs to be paid towards enhancing firm competitiveness. Broad basing the benefits of policy interventions to the overwhelmingly present yet left out micro enterprises including rural areas forms an important concern. This volume attempts to critically examine critical areas of intervention that could open up possibilities of developing a strong micro and small enterprises sector in India.

FORMAL AND INFORMAL SECTOR: CAUSES, CONSEQUENCES AND GOVERNMENT MEASURES IN SOCIO-ECONOMIC DEVELOPMENT Dr. Chinmoy Sarkar, Prof. Sandipan Bhattachariya, Dr. Ranjan Sarkar, 2024-02-15 Formal and Informal Sector in India Causes Consequences and Policy framework in socio economic development is an endeavor of the Research Wing of Siliguri College of Commerce Siliguri to get an insight about the emerging issues faced by the formal and informal sector in India. As a developing economy India has grown in GDP terms since 2005 and is one of the fastest growing economies in the world as of now overtaking the GDP of Great Britain in 2022. Apart from her satisfactory growth in terms of formal planning the size and magnitude of India's informal sector is something which is a concern for both researchers and planners. Large informal clusters in metro cities of Argentina Brazil and Mexico as well as in emerging metros like Surat Siliguri Bhopal and Vijaywada may thwart any comprehensive planning premises of a welfare state. There are issues of livelihoods and educational attainments if the informal base is large and operates beyond the spectrum of Government initiatives. The vulnerabilities of the migrant workers the livelihoods of small traders and the literacy attainments of the school going children enrolled in low cost public schools were severely impacted when India was closed down for almost 187 days in 2020 2022 during the COVID crisis. The presence of informal workers in agricultural sector small scale industries MSMEs and informal employment is anything close to 235 million in India. There have been sincere efforts by our Governments to uplift the rural poor and the marginalized urban clusters by means of self employment schemes and tax incentives but such efforts do not reach the informal economy. Therefore the main focus lies in integrating these clusters with the formal economy. This is undoubtedly a formidable task. Further there is a need for a national floor to protect the wages of the clusters operating in the informal sector in terms of minimum wage health and safety measures as well as literacy attainments. On the other side schooling literacy attainments and livelihoods were severely affected during the lockdown.

These are the issues which are raised in this publication *The Regional Roots of Developmental Politics in India* Aseema Sinha, 2005-04-14 A comparative chapter applies the model to data from China Brazil Russia and the former Soviet Union

Industrial and Labour Economics , **Geographical Research** Kalluri Lakshmi Narasimha Murthy, 1999 With reference to India Globalisation and Migration Ronaldo Munck, 2013-09-13 This book critically examines the new issues and new politics regarding migration in the era of globalisation from a majority world perspective It examines the current shifts in the global political economy and the effects it has for example in relation to rural displacement When and how does this lead to national and or transnational migration We need to examine the ways in which migration is cut across and impacts on the generation of racism and xenophobia in the west The issue of remittances by migrants to the developing nations needs careful study as does the controversial issue of brain drain versus brain gain through migration The growing importance of trafficking for forced labour has now been taken up by various international bodies but is it the new normality or simply an unfortunate side effect of globalisation to be overcome through legislation Migration is becoming increasingly gendered in its composition and flows but also in the receiving countries where men and women do very different jobs We can predict the increasing racialization and gendering of migration but how will the state and society respond to these shifts This book was published as a special issue of Third World Quarterly
