Rush versus harmonic growth De Vries, 1972

By Force of Thought János Kornai, 2008-09-26 The intellectual autobiography of an economist influential in both command economies and free market economies that discusses his life work and the social and political environment during the Second World War the 1956 Hungarian Revolution and its aftermath and the post socialist transition

[The Legacy of Janos Kornai](#) Mehrdad Vahabi, 2025-08-03 This book examines the intellectual legacy of economist Janos Kornai and explores his unique contribution to economics It addresses the key themes within Kornai's work and shows how his ideas relate to the leading figures within economics After highlighting the influence of Marx and Hayek on Kornai his major contribution to comparative economics and analysis of capitalist and socialist economic systems is examined How they fed into his conceptualization of hard and soft budget constraints and complemented his work on economic theory in particular debates around Walrasian and Marshallian equilibrium theory is also discussed This book offers insight into the work of Janos Kornai and his impact upon economics It will be of relevant to students and researchers interested in the history of economic thought and comparative economics

Models of Disequilibrium and Shortage in Centrally Planned Economies C.M. Davis, W. Charemza, 2012-12-06 The centrally planned economies CPEs of the Soviet Union and Eastern Europe have experienced severe imbalances in domestic and external markets over the past several decades As a result they have been chronically afflicted by problems such as excess demand repressed inflation deficits of commodities queues waiting lists and forced savings Economists have responded to these phenomena by developing appropriate theoretical and empirical models of CPEs Of particular note have been the pioneering studies of Richard Portes on disequilibrium econometric models and Janos Kornai on the shortage economy Each approach has attracted followers who have produced numerous innovative macro and microeconomic models of Poland Czechoslovakia the German Democratic Republic Hungary and the USSR These models have proved to be of considerable value in the analysis of the causes consequences and remedies of disequilibrium phenomena Inevitably the new research has also generated controversies both between and within the schools of shortage and disequilibrium modelling concerning the fundamental nature of the socialist economy theoretical concepts and definitions the specification of models estimation techniques interpretation of empirical findings and policy recommendations Furthermore the research effort has been energetic but incomplete so many gaps exist in the field

Facing the Era of Great Transformation Wu Jinglian, 2021-03-31 This book collects essays from Chinese economic sage who was the mastermind of the reform and opening and persistent champion of market driven development In the essays he outlines his vision of the systemic reform

needed for today's China from rule of law to completion of the market system and reform of state owned enterprises Dr Wu's thoughts are always of interest but at this pivotal moment of Chinese economic recalibration his views will be of more value than ever to scholars economists journalists and those in civil society Socialism and Underdevelopment Ken Post, Philip Wright, 2010-11-26 In this book first published in 1989 Ken Post and Phil Wright provide a critical analysis of socialist construction in underdeveloped countries Pointing out that all the socialist revolutions of the twentieth century have occurred in underdeveloped peripheral capitalist countries they focus on the relationship between socialism and underdevelopment They bring together the insights of both development theory and the political economy of socialism and draw upon their direct experience of the state socialist societies as diverse as North Korea Yugoslavia Vietnam and the Soviet Union East European Economies Post-Helsinki United States. Congress. Joint Economic Committee, 1977 **Communist Planning versus Rationality** János Mátyás Kovács, 2022-04-14 This volume examines concepts of central planning a cornerstone of political economy in Soviet type societies It revolves around the theory of optimal planning which promised a profound modernization of Stalinist style verbal planning Encouraged by cybernetic dreams in the 1950s and supporting the strategic goals of communist leaders in the Cold War optimal planners offered the ruling elites a panacea for the recurrent crises of the planned economy Simultaneously their planning projects conveyed the pride of rational management and scientific superiority over the West The authors trace the rise and fall of the research program in the communist era in eight countries of Eastern Europe including the Soviet Union and China describing why the mission of optimization was doomed to fail and why the failure was nevertheless very slow The theorists of optimal planning contributed to the rehabilitation of mathematical culture in economic research in the communist countries and thus to a neoclassical turn in economics all over the ex communist world However because they have not rejected optimal planning as computopia there is a large space left behind for future generations to experiment with Big Optimal Plans anew based at this time on artificial intelligence and machine learning **The Distorted World of Soviet-Type Economies (Routledge Revivals)** Jan Winiecki, 2013-08-16 The Soviet Union and Eastern Europe provide unique examples of large scale relatively highly developed centrally planned economies In the 1980s economists in both the East and West began to focus with increasingly critical attention on the economies of the Soviet Bloc in an attempt to explain why they were performing so poorly in comparison with the economies of the Western powers and the capitalist countries of South East Asia First published in 1988 this substantial and innovative contribution to the critical literature on the economies of the former Soviet bloc is unusual in that its author is equally familiar with both Western and Eastern sources It highlights in particular a discrepancy between the behaviour of individuals in Soviet style economies and that expected of agents in a market system It proceeds to outline how the consequent discordance between microeconomic practice and macroeconomic planning generates fundamental economic distortions
