Science Citation Index, 1994 Vols for 1964 have guides and journal lists Introduction to Glass Science.. L. D. Pye, H. J. Stevens, W. C. La Course, 1972 Glass Science R. H. Doremus, 1994-04 This Second Edition of Robert H Doremus's classic Glass Science has been extensively revised and updated to reflect recent advances while retaining the pedagogical structure that made its predecessor a superb tool for both teaching and professional research Special emphasis is placed on areas of research that have been particularly active in recent years Two new chapters have been added one covers chemical durability the reaction of glass with water which includes recent work related to corrosion of glass and radioactive waste disposal the other concerns the reaction of gases with glass especially oxygen Other new or expanded discussions cover recent advances in the structure of glass zirconium fluoride glasses and electrical conductivity of glass **Current Trends In The Science And Technology Of Glass - Proceedings Of The Indo-us Workshop** Himanshu Jain, Antonio R Cooper, K J Rao, D Chakravorty, 1989-09-01 Contents Glass Surfaces C Pantano Current Thoughts on Crystal Nucleation and Growth in Viscous Liquids D Turnbull Design of Glass Ceramics G Beall Dynamic Ions in Oxide Glasses H Jain Black Boxes Analysis of Glass Melting Furnaces A R Cooper Some Recent Studies of Structure and Modelling in Glasses K J Rao Ion Exchange Processing of Glasses D Chakravorty Nonlinear Structural Relaxation in Glassy Systems An Interpretation of the Narayanaswamy Model B Bagchi Crystallisation of Metallic Glasses P R Rao Fast Ion Conduction in Glasses The New Solid Electrolytes C A Angell Strength and Fatigue of Oxide Glasses C R Kurkjian Models of the Glass Transitions P K Gupta Colloidal Glasses A K Sood Glass in New Electro Optic Devices E Snitzer Optical Coatings on Glass by Sol Gel Processing Achievements and Future Tasks D Ganguli Oxidation Reduction Equilibrium During Preform Making of Optical Fibre A Paul Application of Finite Element Analysis to Glass Processing A K Varshneya Double Glass Transition and Double Stage Crystallization in Te Based Chalcogenide Glasses S Ashokan E S R Gopal Heat Release and Calorimetry Near Glass Transition A K Raychaudhuri M Rajeswan Heavy Metal Fluoride Glasses C T Moynihan Readership Materials scientists and condensed matter physicists *Introduction to Glass Science and Technology* James E Shelby, 2007-10-31 This book provides a concise and inexpensive introduction for an undergraduate course in glass science and technology The level of the book has deliberately been maintained at the introductory level to avoid confusion of the student by inclusion of more advanced material and is unique in that its text is limited to the amount suitable for a one term course for students in materials science ceramics or inorganic chemistry The contents cover the fundamental topics of importance in glass science and technology including glass formation crystallization phase separation and structure of glasses Additional chapters discuss the most important properties of glasses including discussion of physical optical electrical chemical and mechanical properties A final chapter provides an introduction to a number of methods used to form technical glasses including glass sheet bottles insulation fibre optical fibres and other common commercial products In addition the book contains discussion of the effects

of phase separation and crystallization on the properties of glasses which is neglected in other texts Although intended primarily as a textbook Introduction to Glass Science and Technology will also be invaluable to the engineer or scientist who desires more knowledge regarding the formation properties and production of glass *Glass Science*, 1964 Glass III Minoru Tomozawa, Robert H. Doremus, 2013-10-22 Treatise on Materials Science and Technology Volume 22 Glass III is the third of a series of review articles on glass science and technology The book discusses the theories of structure and bonding and experimental methods for analyzing silicate glass surfaces the gel methods for making glasses and the water in glass method The text also describes the fracture and fatigue of glass as well as the stresses in glass to metal seals Materials scientists materials engineers and students taking materials science and technology courses will find the book invaluable

Elasticity and Strength in Glasses D Uhlmann, 2012-12-02 Glass Science and Technology Volume 5 Elasticity and Strength in Glasses covers the scientific and engineering aspects of glass elasticity and strength This volume is organized into six chapters and begins with the examination of the elastic properties of vitreous silica and silicate glasses including those that contain moderate amounts of other network formers The following chapters describe the fracture mechanics and inelastic deformation of oxide metallic and polymeric glasses The discussion then shifts to the concept of glass strengthening approaches and some technologies of significant practical application to glasses A chapter explores the process of thermal tempering of glass including the physics theories and standards of the process The last chapter focuses on the practical aspects of chemical strengthening and the mechanical and physical properties of the obtained glass This book is of great benefit to glass scientists and researchers PASCAL explore, 1989 Introduction to Glass Science and Technology, 3rd Edition James E. Shelby, 2020-10-06 This introductory text is ideal for undergraduates and graduates presenting the fundamental topics in glass science and technology Frontiers of Glass Science: Proceedings of the International Conference on Frontiers of Glass Science International Conference on Frontiers of Glass Science, 1980 Glass Donald Robert Uhlmann, N. J. Kreidl, 1984 **Introduction to Glass Science** L. Pye, 2012-12-06 Glass technologists are fascinated by glass exploration as well as application of glass is expanding and the influx of documentation is bewildering There were about 200 papers on just semi conduction in glasses in 1970 and one has to scan about 200 papers a month to sense the pulse of glass science Yet there are many in industry and education in science or engineering who require or wish to have coherent comprehensive and contemporary information on this exciting material glass The Tutorial Symposium offered as an Introduction to Glass Science in Alfred represents an earnest attempt to fulfill this need It has been designed to provide both broad and technical instruction for participants and readers who are not specialists Glass is not only a material but a condition of matter the vitreous state The topic therefore is introduced by a careful consideration of the nature of glass or the vitreous state The universality of the vitreous state is now generally recognized not just a few but very many structures can be obtained without appreciable crystallization There is no restricted family of structures characteristic of glass

formation as long as crystallization is avoided every liquid will solidify to a non crystalline substance Structural analysis in each case is now to be postulated and has become increasingly successful The Alfred Introduction to Glass Science offers a representative overview of methods and results *Advances in Glass Science and Technology* Vincenzo Maria Sglavo, 2018-06-06 In this book some recent advances in glass science and technology are collected In the first part the structure and crystallization of innovative glass compositions are analysed In the second part innovative applications are described from the use of glass in optical devices and lasers to fibres in composites micropatterned components in sensors and microdevices beads in building walls and sealing in solid oxide fuel cells **Glass in Science and Industry** Corning Glass Works, 1960 **Arts & Humanities Citation Index**, 1986 A multidisciplinary index covering the journal literature of the arts and humanities It fully covers 1 144 of the world's leading arts and humanities journals and it indexes individually selected relevant items from over 6 800 major science and social science journals **Glass Science and Technology** Eric Le Bourhis, 2005 **The Compact Edition of the Oxford English Dictionary** Sir James Augustus Henry Murray, 1971 Micrographic reproduction of the 13 volume Oxford English dictionary published in 1933 **Glass Science and its Applications** Nandyala Sooraj Hussain, José D.
