An Introduction to Animal Law Cooper,2012-12-02 Legislation relating to animals has ancient origins and in many civilizations certain species have held particular significance be it religious cultural nutritional or sporting As a general rule the law was primarily concerned with animals as property rather than in need of protection until the 19th century Since the 1970s animal law has proved to be a growth area in the production and enforcement of both national and international legislation This has been particularly so in the areas of conservation and welfare and there has been extensive legal and philosophical consideration of the status of animals This book is not intended to be a standard text but rather a handbook in the true sense a guide for the lay person namely to help the non lawyer to understand the basic concepts of animal law and to provide the lawyer who is the lay person in the world of animal science with an introduction to relevant concepts and literature which are not normally found in the conventional legal texts

Screening the Nonhuman Amber E. George,J.L. Schatz,2016-04-27 Screening the Nonhuman draws connections between how animals represented on screen translate into reality In doing so the book demonstrates that consuming media is not a neutral act but rather a political one The images humans consume have real world consequences for how animals are treated as actors as pets and in nature The contributors propose that altering the representations of animals can change the way humans relate to non humans Our hope is for humans to generate more ethical relationships

with non humans ultimately mediating reality both in terms of fiction and non fiction To achieve this end film television advertisements and social media are analyzed through an intersectional lens But the book doesn't stop here Each author creates counter representational strategies that promise to unweave the assumptions that have led to the mistreatment of humans and non humans alike *Scottish Wildlife* Michael M.
