natural fertilization not to say that SCNT should be regarded as unnatural fertilization Unique cellular events arising from SCNT have no parallel in natural fertilization and early pre implantation development The list includes the requirement of donor cell nuclear remodeling disposal of donor cell organelles the possibility of heteroplasmy i e presence of mixed mitochondrial genomes and altered mode of oocyte activation Thanks to seminal contributions of my distinguished colleagues the present volume reviews the progress of SCNT technology in major mammalian species including mouse pig and cattle while at the same time parallels can be drawn and distinctions made between the cellular and molecular basis of nuclear transfer and fertilization
