Individual chapters are devoted to specific health conditions or illnesses, addressing the current state of the science in the four organizing CAM domains including available information regarding benefits, risks or safety considerations. Unique aspects of this volume are the chapters related to evaluation of the evidence base for integrative therapies; new animal model research with herbal preparations focused on the serious problem of sepsis in the ICU; guidance for counseling patients with chronic lung illnesses who may be desperate for a cure and palliative and end of life care for patients with chronic lung conditions.
