Looking at Buildings, 1996 *New Theory of Beauty* Guy Sircello, 2015-03-08 Ever since the eighteenth century when Kant opened the floodgates of subjectivism in aesthetics common men and philosophers alike have despaired of finding a basis for judgments about beauty This book provides a comprehensive theory that encompasses beauty in art and nature as well as intellectual utilitarian and moral beauty The author argues that the beauty of objects can be reduced to the beauty of properties of those objects which in turn can be understood in terms of properties of qualitative degree The theory developed first with respect to color is then extended to include all sensory and non sensory qualities The author shows how the theory explicates and resolves disagreements about what is beautiful and discusses its relevance to the traditional notions of harmony and sublimity His is an objectivist theory of beauty and it enables him in conclusion to demonstrate why we enjoy perceiving beauty Originally published in 1975 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

America's Oddest Buildings Katie Kawa, 2016-12-15 Architecture is a very special kind of art and sometimes it veers into the oddest places of our imaginations Buildings both inspired by the past and looking ahead to the future are common sights but America is full of goofy buildings in weird places from a building shaped like a picnic basket in Ohio to man made dinosaurs standing guard in California This book takes an exciting look at some of the strangest places in the United States with colorful photographs and engaging stories about the how and why of these oftentimes massive construction projects

conflict between the federal government and the church missionary societies that had been given responsibility for their day to day operation A failure of leadership and resources meant that the schools failed to control the tuberculosis crisis that gripped the schools for much of this period Alarmed by high death rates Aboriginal parents often refused to send their children to the schools leading the government adopt ever more coercive attendance regulations While parents became subject to ever more punitive regulations the government did little to regulate discipline diet fire safety or sanitation at the schools By the period s end the government was presiding over a nation wide series of firetraps that had no clear educational goals and were economically dependent on the unpaid labour of underfed and often sickly children **Wisconsin Library**
