Paynter, 1995 **Ecology and Conservation of Tropical Ungulates in Latin America** Sonia Gallina-Tessaro, 2019-11-20

This book brings together the latest information on tropical ungulates in different Latin American countries. These animals are not only important from the point of view of their role in different ecosystems but also have cultural value for people. The book also discusses topics such as habitat transformation and hunting as these species are an important source of food in many places. Addressing ungulate natural communities in diverse ecosystems and countries, the book provides information on specific aspects of each of the most representative species and highlights topics to help readers better understand these species and develop effective management and conservation strategies. The information presented also reveals the need for more knowledge and will hopefully provide the incentive for continued studies on this important group of animals. This publication serves as a reference for academic research on ungulate ecology, behavior, and dynamics as well as the basis for conservation strategies. *Natural Areas Journal*, 2009 [The Great American Biotic Interchange](#) Alberto Luis Cione, Germán Mariano Gasparini, Esteban Soibelzon, Leopoldo Héctor Soibelzon, Eduardo Pedro Tonni, 2015-04-24

South American ecosystems suffered one of the greatest biogeographical events after the establishment of the Panamanian land bridge called the Great American Biotic Interchange (GABI). This refers to the exchange in several phases of land mammals between the Americas; this event started during the late Miocene with the appearance of the Holarctic Procyonidae. Huayquerian Age in South America and continues today. The major phases of mammalian dispersal occurred from the Latest Pliocene to the Late Pleistocene. The most important and richest localities of Late Miocene Holocene fossil vertebrates of South America are those of the Pampean region of Argentina. There are also several Late Miocene and Pliocene localities in western Argentina and Bolivia. Other important fossils have been collected in localities of Pleistocene age outside Argentina: Tarija, Bolivia; karstic caves of Lagoa Santa and the recently explored caves of Tocantins, Brazil; Talara, Peru; La Carolina, Ecuador; Muaco, Venezuela; and Cueva del Milodón, Chile, among others. The book discusses basic information for interpreting the GABI, such as taxonomic composition, incorporating the latest revisions at classical and new localities for each stage, addressing climate environments and time boundaries for each stage. It includes the chronology and dynamics of the GABI, the integration of South American mammalian faunas through time, the Quaternary mammalian extinctions, and the composition of recent mammalian fauna of the continent.
