Slim Chance Fat Hope Catherine Swee Kian Tay,2004 Slimming and dieting has become such a fixation among Singaporeans that manufacturers and distributors of weight reducing products are laughing all the way to the bank However the recent spate of controversies surrounding slimming pills is no laughing matter This book is a collection of articles accessible to anyone who wants to know more about the phenomenon its consequences and related topics Its purpose is not to champion the OC idealOCO of being slim but rather to provide a platform for meaningful discussion and for educating the general public about a healthier way of living Written by people from all walks of life such as doctors lawyers academics counsellors and journalists the book takes a thoughtful and at times light hearted look at Singaporeans OC obsessionOCO with their body image and reflects on other issues it raises The star attractions of this book are interviews with two of Singapore s best loved comedians Moses Lim and Hossan Leong Let them give you a humorous first hand account of how they view and come to terms with their own body size and turn it into confidence both on and off the stage Contents Medical Science Perspective Legal Perspective Behavioural Ethical Perspective Social Community Perspective Towards a Healthy Lifestyle Readership General public parents with teenage children women concerned about slimming and health **Think Thin** Valerie Wells,1992 How you look in your mind is how you ll look in the mirror With this simple premise Valerie Wells offers 30 easy effective visualizations designed to facilitate anyone s diet and exercise efforts by replacing fat self images with healthier more positive visions of the body Slim and Recovered Ping Wang,2010-04 As an alternative therapist with limited knowledge I actually have greater freedom and objectivity in performing my analyses since I am not bound by the restrictions of the standard theories For example since the emergence of the idea that carbohydrates and excess calories are the causes of obesity nearly all subsequent theories have involved carbo diets carbo detox or low calorie diets calorie burning and the like However my observations and practice over the past dozen years have proven that carbohydrates fats and sugar and possibly blood type affect body weight increase only when a person consumes greater than normal quantities If dietary intake is too low less than normal thus not meeting the body s needs for cell growth these factors have little or no influence Why does the title of this book combine the words slim and recovered Simply because in over 80 percent of obesity cases the patients have other health problems as well The most common complaint is acute or chronic gastric problems others include vertigo anemia diabetes high blood pressure high cholesterol levels heart liver and kidney problems and menstrual difficulties So we can see that excess body weight is closely related to other health complaints In Slim and Recovered Ping

Wang analyzes the problems of being overweight and disease based solely on his observations and experience in therapeutic practice. He limits the illnesses discussed here to those that have been handled with satisfactory results providing greater insight. The basic philosophy introduced in this book is that we should not consume more food than our digestive organs can handle so that we can avoid obesity and other health problems and we should not deceive ourselves by thinking that fruit, vegetables, and water will not make us fat. These cases are analyzed from a perspective that is unconventional yet based on reality. Discover the answers to these difficult questions: Why do some people eat a lot but stay slim? I consume low fat, low carb, low calorie food and drink and routinely exercise on the treadmill, why am I still overweight? Why do some vegetarians get high blood pressure and even suffer strokes? Why do some people have strokes when they're still very young? I regularly exercise with weights and equipment, why are my arms and legs getting larger, not smaller? My mother drinks plenty of water, why are her legs swollen and her uric acid levels so high?
