A New History of Life Peter Ward, Joe Kirschvink, 2015-04-07 The history of life on Earth is in some form or another known to us all or so we think A New History of

Life offers a provocative new account based on the latest scientific research of how life on our planet evolved the first major new synthesis for general readers in two decades Charles Darwin s theories first published more than 150 years ago form the backbone of how we understand the history of the Earth In reality the currently accepted history of life on Earth is so flawed so out of date that it s past time we need a New History of Life In their latest book Joe Kirschvink and Peter Ward will show that many of our most cherished beliefs about the evolution of life are wrong Gathering and analyzing years of discoveries and research not yet widely known to the public A New History of Life proposes a different origin of species than the one Darwin proposed one which includes eight foot long centipedes a frozen snowball Earth and the seeds for life originating on Mars Drawing on their years of experience in paleontology biology chemistry and astrobiology experts Ward and Kirschvink paint a picture of the origins life on Earth that are at once too fabulous to imagine and too familiar to dismiss and looking forward A New History of Life brilliantly assembles insights from some of the latest scientific research to understand how life on Earth can and might evolve far into the future

Climate Change Biology Lee Hannah,2021-05-11 Climate Change Biology Third Edition addresses how climate change may affect life on the planet particularly its impact on biology Presented in three parts it deals extensively with the physical evidence of climate change and modeling efforts to predict its future Biological responses are then addressed from individual physiology to populations and ecosystems adaptation and evolution The final section examines the specific impact climate change may have on natural resources particularly relating to human livelihood This book will be a useful asset to the growing number of both undergraduate and graduate courses on climate change All sections are updated using the more than 5 000 research papers that have appeared on the topic since the publication of the second edition Sections on the combined effects of ocean acidification and climate change are especially strengthened with over six new case studies and end of chapter questions in each chapter Covers the evolving discipline of human induced climate change and the resulting shifts in the distributions of species and timing of biological events Offers positive solutions and policy relevant insights on how extinctions can be avoided Includes stunning full color illustrations from original research
