## **Lost Architectures:**

**Lost Buildings** Jonathan Glancey, 2008 Have you ever wished that you could have seen King Solomon's mighty Temple in Jerusalem or climbed to the top of the legendary Tower of Babel? What must it have been like to have paraded up and down the great glass galleries of the Crystal Palace in London in 1851? Why is the Euston Arch demolished in 1961 still missed? What would buildings described in much loved books have been like if these had existed outside their author's imaginations? Imagine walking through the labyrinthine corridors of Mervyn Peake's mythical Gothic fortress Gormenghast or visiting Toad Hall. And what of the current trend for reconstructing buildings which were destroyed in wartime or for political reasons? **Lost Buildings** is an invitation to visit buildings long vanished or those demolished within living history: some by dim politicians, others by war or acts of God, that we would pay good money and travel a long way to see if only they existed today. It looks too at buildings from literature, myth and children's stories and some lost opportunities: fantastic, ambitious designs that were never built. There are countless buildings that remain vivid in the collective memory, whether they were once real or were only ever imagined. **Lost Buildings** brings these together for the reader's curiosity and delight.

**Lost Architectures** Neil Spiller, 2001-03-23 This book stands in opposition to the popular notion that the best architecture is built on compromise. Rather, Neil Spiller argues, the most original and brave products of the architectural mind are often to be found in those projects which, for whatever reason, never came to fruition. **Lost Architectures** presents an array of such projects from the last decades of the twentieth century, constituting the unrealised dreams of some of the most inspirational architects working in the period. Most of the projects featured here have seldom, if ever, been published before and some represent the last hand-drawn work of their creators before the age of the computer finally came into full force. Whilst they do not follow any specific style, these projects embody a spirit defined by Spiller as New Romanticism: a spirit which combines elements of aesthetic decadence and a certain camp mannerism with a love of angularity and mechanised ritual. Some of the architects in question are still in practice with a great deal of high-profile built work behind them; others have never been recognised as they perhaps should have been. In both cases, this book is an invaluable resource of information and inspiration for students of architecture as well as for theorists, historians and lay readers. It provides essential exposure for a range of work of great vitality which might otherwise risk being lost in the course of time.

Impact of Industry 4.0 on Architecture and Cultural Heritage Bolognesi, Cecilia Maria, Santagati, Cettina, 2019-12-13 In the modern age of the 4th Industrial Revolution, advancements in communication and connectivity are transforming the professional world as new technologies are being embedded into society. These innovations have triggered the development of a digitally driven world where adaptation is necessary. This is no different in the architectural field where the changing paradigm has opened new methods and

advancements that have yet to be researched Impact of Industry 4.0 on Architecture and Cultural Heritage is a pivotal reference source that provides vital research on the application of new technological tools such as digital modeling within architectural design and improves the understanding of the strategic role of Industry 4.0 as a tool to empower the role of architecture and cultural heritage in society Moreover the book provides insights and support concerned with advances in communication and connectivity among digital environments in different types of research and industry communities While highlighting topics such as semantic processing crowdsourcing and interactive environments this publication is ideally designed for architects engineers construction professionals cultural researchers academicians and students *The Comics of Chris Ware* David M. Ball, Martha B. Kuhlman, 2010 An assessment of the achievement and aesthetic of one of America's brightest comics innovators **Humanitarian Architecture** Esther Charlesworth, 2014-06-27 Never has the demand been so urgent for architects to respond to the design and planning challenges of rebuilding post disaster sites and cities In 2011 more people were displaced by natural disasters 42 million than by wars and armed conflicts And yet the number of architects equipped to deal with rebuilding the aftermath of these floods fires earthquake typhoons and tsunamis is chronically short This book documents and analyses the expanding role for architects in designing projects for communities after the event of a natural disaster The fifteen case studies featured in the body of the book illustrate how architects can use spatial sensibility and integrated problem solving skills to help alleviate both human and natural disasters The cases include Lizzie Babister Department of International Development UK Shigeru Ban Winner of The Pritzker Architecture Prize 2014 Shigeru Ban Architects and Voluntary Architects Network Japan Eric Cesal Disaster Reconstruction and Resiliency Studio and Architecture for Humanity Japan Hsieh Ying Chun Atelier 3 Taiwan Nathaniel Corum Education Outreach and Architecture for Humanity USA Sandra D Urzo Shelter and Settlements and International Federation of the Red Cross and Red Crescent Societies Switzerland Brett Moore World Vision International Australia Michael Murphy MASS Design Group USA David Perkes Gulf Coast Community Design Studio USA Paul Pholeros Healthabitat Australia Patama Roonrakwit Community Architects for Shelter and Environment Thailand Graham Saunders International Federation of Red Cross and Red Crescent Societies Switzerland Kirtee Shah Ahmedabad Study Action Group India Maggie Stephenson UN HABITAT Haiti Anna Wachtmeister Catholic Organisation for Relief and Redevelopment Aid the Netherlands The interviews and supporting essays show built environment professionals collaborating with post disaster communities as facilitators collaborators and negotiators of land space and shelter rather than as saviors of the world modernists as often portrayed in the design media The goal is social and physical reconstruction as a collaborative process involving a damaged community and its local culture environment and economy not just shelter projects that build houses but leave no economic footprint or longer term community infrastructure What defines and unites the architects interviewed for Humanitarian Architecture is their collective belief that through a consultative process of spatial problem solving the design profession can contribute in a

*From the Temple to the Castle* Lee Morrissey, 1999 Visiting Britain in the mid 18th century Andre Rouquet wrote that in England more than in any other country every man would fain be his own architect Not surprisingly then several of the most important 18th century British authors were also practicing architects John Vanbrugh a playwright designed Blenheim Palace the poet Alexander Pope offered architectural

drawings for redesigning the houses of friends and Horace Walpole claimed that the home he renovated Strawberry Hill inspired his Novel *The Castle of Otranto*. The work of John Milton and Thomas Gray also exhibits an abiding interest in architecture. By examining the connections between literature and architecture in the work of these writers and by viewing architecture in literary terms, Lee Morrissey traces a narrative of cultural change in the Augustan age and beyond. A literary scholar with a strong background in architectural theory and practice, Morrissey examines architectural references made by these authors and architectural publications familiar to them. Each chapter establishes a connection with architecture in the careers of an author and then describes how a principal text, *Paradise Lost*, *The Provoked Wife*, *An Essay on Man*, *Elegy Written in a Country Churchyard*, and *The Castle of Otranto*, focuses the literary and historical issues of the period in architectural terms. While some 20th-century architectural theorists have worried that treating architecture in literary terms robs it of its social function, Morrissey argues that architecture can be a language and still participate in political and social contexts because language itself is political and social. The fruit of his argument is a unique intellectual history of late 17th and early 18th-century Britain of use to scholars of architectural history and landscape architecture as well as of literature.
