Lost at the Frontier Deborah Shapley,Rustum Roy,1985   Science and Technology Policy Takefumi Tanaka,1992
A History of Science Policy in the United States, 1940-1985 ,1986   **Expanding Underrepresented Minority Participation** Institute of Medicine,National Academy of Engineering,National Academy of Sciences,Policy and Global Affairs,Committee on Science, Engineering, and Public Policy,Committee on Underrepresented Groups and the Expansion of the Science and Engineering Workforce Pipeline,2011-07-29 In order for the United States to maintain the global leadership and competitiveness in science and technology that are critical to achieving national goals we must invest in research encourage innovation and grow a strong and talented science and technology workforce Expanding Underrepresented Minority Participation explores the role of diversity in the science technology engineering and mathematics STEM workforce and its value in keeping America innovative and competitive According to the book the U S labor market is projected to grow faster in science and engineering than in any other sector in the coming years making minority participation in STEM education at all levels a national priority Expanding Underrepresented Minority Participation analyzes the rate of change and the challenges the nation currently faces in developing a strong and diverse workforce Although minorities are the fastest growing segment of the population they are underrepresented in the fields of science and engineering Historically there has been a strong connection between increasing educational attainment in the United States and the growth in and global leadership of the economy Expanding Underrepresented Minority Participation suggests that the federal government industry and post secondary institutions work collaboratively with K 12 schools and school systems to increase minority access to and demand for post secondary STEM education and technical training The book also identifies best practices and offers a comprehensive road map for increasing involvement of underrepresented minorities and improving the quality of their education It offers recommendations that focus on academic and social support institutional roles teacher preparation affordability and program development   **American Science Policy since World War II** Bruce Smith,2011-02-01 Just after the close of World War II America s political and scientific leaders reached an informal consensus on how science could best serve the nation and how government might best support science The consensus lasted a generation before it broke under the pressures created by the Vietnam War Since then the nation has struggled to reestablish shared beliefs about the means and goals of science policy In American Science Policy Since World War II author Bruce L R Smith makes sense of the break between science and government and identifies the patterns on postwar science affairs He explains that what might otherwise seem to be a miscellaneous set of separate episodes actually constituted a continuing debate of national importance that was closely linked to broad political and economic trends Smith s precise and unique analysis gives both the scholar and historian a better understanding of where we are and how we got there while casting a modest light on future policy directions   *Fundable Knowledge* A.D. Van Nostrand,2013-11-05 Knowledge is the basic output of the defense

technology establishment in the United States it is what enables the development of weapon systems From this premise this volume explores the process of knowledge production in defense technology from the beginnings of the Cold War to the present time Produced through the process of research and development R D technical knowledge for defense is an economic commodity It is fundable in the sense of having future value Like other commodities in the futures market it is purchased before it is produced But unlike those other commodities this knowledge is typically produced through the joint efforts of the customer and the vendor This study highlights two polar aspects of knowledge production technology development and technology transfer It centers on the present shifting concept of defense conversion that is redefining defense technology policy The book also includes cited documents pertaining to the transactions that engage customers and vendors in the process of knowledge production The documents constitute a literature of needs and claims and they reveal two chief properties problem formulation and tactical positioning Apart from the substantive yield of these particular documents the strategy of evidence in this volume has broad implications for further study suggesting a means of analyzing knowledge production in other large social systems   Restructuring Federal Climate Research to Meet the Challenges of Climate Change National Research Council,Division of Behavioral and Social Sciences and Education,Division on Earth and Life Studies,Committee on Strategic Advice on the U.S. Climate Change Science Program,2009-04-25 Climate change is one of the most important global environmental problems facing the world today Policy decisions are already being made to limit or adapt to climate change and its impacts but there is a need for greater integration between science and decision making This book proposes six priorities for restructuring the United States climate change research program to develop a more robust knowledge base and support informed responses Reorganize the Program Around Integrated Scientific Societal Issues Establish a U S Climate Observing System Support a New Generation of Coupled Earth System Models Strengthen Research on Adaptation Mitigation and Vulnerability Initiate a National Assessment of the Risks and Costs of Climate Change Impacts and Options to Respond Coordinate Federal Efforts to Provide Climate Information Tools and Forecasts Routinely to Decision Makers   **U.S. Government Publication** John Spencer Walters,2005-02-09 Examines the forces that have deflected U S Government publication from becoming the public enterprise that Congress had conceived in the nineteenth century Walters covers everything from the deeply embedded ideas of the American political consciousness and its inhibitive effect on the production distribution preservation and quality of U S Government documents to reasons why the executive department circumvented the U S Government Printing Office to the causes behind the conspicuous lawlessness of government publication to how the folkways of science served to constrict the sphere of government publication to a narrow strip

Democratic Theory and Technological Society Richard B. Day,Ronald Beiner,Joseph Masciulli,2017-07-05 What are the chief challenges posed to contemporary democracy by modern technology and how can democratic theory best respond to or at least reflect on those challenges Inhabiting the kind of technologically advanced era in which we live what sources

are available within political theory for theoretical insight concerning the problem of democratic engagement with technology The purpose of this volume is to canvas a broad range of theorists and theoretical traditions in order to address these questions including Hegel and Marx Rousseau and John Dewey Heidegger and Simone Weil Habermas and Walter Benjamin Hannah Arendt and Hans Jonas Commentaries on all these important thinkers focused on the issue of contemporary technology as posing unique social and political challenges for democratic political life yields rich and ambitious resources for theoretical reflection   Recent Library Additions ,1985   Living in the Labyrinth of Technology Willem H. Vanderburg,2005-12-15 From the very beginnings of their existence human beings have distinguished themselves from other animals by not taking immediate experience for granted Everything was symbolized according to its meaning and value a fallen branch from a tree became a lever a tree trunk floating in the river became a canoe Homo logos created communities based on cultures humanity s first megaproject Further symbolization of the human community and its relation to nature led to the possibility of creating societies and civilizations Everything changed as these interposed themselves between the group and nature Homo societas created ways of life able to give meaning direction and purpose to many groups by means of very different cultures humanity s second megaproject What Das Kapital did for the nineteenth century and La technique did for the twentieth Willem H Vanderburg s Living in the Labyrinth of Technology seeks to create for the twenty first century an attempt at understanding the world in a manner not shackled to overspecialized scientific knowing and technical doing Western civilization may well be creating humanity s third megaproject based not on symbolization for making sense of and living in the world but on highly specialized desymbolized knowing stripped of all peripheral understanding Vanderburg focuses on two interdependent forces in his narrative namely people changing technology and technology changing people The latter aspect although rarely considered turns out to be the more critical one for understanding the spectacular successes and failures of contemporary ways of life As technology continues to change the social and physical world the experiences of this world grow people s minds and society s cultures thereby re creating human life in the image of technology Living in the Labyrinth of Technology argues that the twenty first century will be dominated by this pattern unless society intervenes on human as opposed to technical terms   **Where Darwin Meets the Bible** Larry Witham,2005 Where Darwin Meets the Bible provides an account of the lasting conflict between creationists and evolutionists   **NASA Technical Memorandum** ,1991   *Peerless Science* Daryl E. Chubin,Edward J. Hackett,1990-07-05 This book examines the structure and operation of peer review as a family of quality control mechanisms and looks at the burdens placed on the various forms of peer review Assuming that peer review is central to the functioning of U S science policy Chubin and Hackett explore the symbolic and practical value of peer review in the making implementing and analysis of this policy   **Materials Science and Engineering Serving Society** R.P.H. Report number 6, The relationship between the use of U.S. government technical reports by U.S. aerospace engineers and scientists and selected institutional and sociometric variables** ,1991 A study was undertaken that investigated the relationship between the use of U S government technical reports by U S aerospace engineers and scientists and selected institutional and sociometric variables Survey research is the methodology used for the study Data were collected by means of a self administered mail questionnaire The approximately 34 000 members of the American Institute of Aeronautics and Astronautics AIAA served as the study population The response rate for the survey was 70 percent A dependent relationship was found to exist between the use of U S government technical reports and three of the institutional variables academic preparation years of professional aerospace work experience and technical discipline The use of U S government technical reports was found to be independent of all of the sociometric variables The institutional variables best explain the use of U S government technical reports by U S aerospace engineers and scientists *A Final Story* Nasser Zakariya,2017-11-14 Popular science readers embrace epics the sweeping stories that claim to tell the history of all the universe from the cosmological to the biological to the social And the appeal is understandable in writing these works authors such as E O Wilson or Steven Weinberg deliberately seek to move beyond particular disciplines to create a compelling story weaving together natural historical events scientific endeavor human discovery and contemporary existential concerns In AFinal Story Nasser Zakariya delves into the origins and ambitions of these scientific epics from the nineteenth century to the present to see what they reveal about the relationship between storytelling integrated scientific

knowledge and historical method While seeking to transcend the perspectives of their own eras the authors of the epics and the debates surrounding them are embedded in political and social struggles of their own times struggles to which the epics in turn respond In attempts to narrate an approach to a final true account these synthesizing efforts shape and orient scientific developments old and new By looking closely at the composition of science epics and the related genres developed along with them we are able to view the historical narrative of science as a form of knowledge itself one that discloses much about the development of our understanding of and relationship to science over time **Common Pain Conditions - E-Book** Marc S.
