Conservation of Urban and Architectural Heritage Kabila Hmood, 2023-11-29 This book provides a comprehensive overview of cultural heritage including urban and architectural heritage in cities worldwide It highlights the importance of studying urban conservation and the effects of increasing population growth in contemporary cities which causes expansion of modern urban land use especially towards the historical centers and districts of cities Preserving architectural and urban heritage is very important in illustrating the concept of dual cities in which the old parts preserve their architectural style while the modern part of the city is being developed in the same heritage style The book is organized into three sections on Urban Heritage within Urban Renewal Policies Conservation of Urban and Architectural Heritage and Loss of Identity Cultural and Architectural Heritage

*Graphical Heritage* Luis Agustín-Hernández, Aurelio Vallespín Muniesa, Angélica Fernández-Morales, 2020-05-11 This book presents the proceedings of the 18th International Conference on Graphic Design in Architecture EGA 2020 focusing on heritage including architectural and graphic heritage as well as the graphics of heritage The third of three volumes this book discusses topics related to mapping cartography and landscape as well as innovative education methods particularly in the context of teaching architectural heritage It covers historical cartography and new cartographies as well as methods for representing the landscape and reports on different learning methods and practices including classroom methods but also those involving more active participation and multidisciplinary and collaborative production Given its scope this book will appeal cartographers designers and teachers providing them with extensive information on innovative methodologies and a source

of inspiration for their future work      *Conservation of Architectural and Urban Heritage* Tarek Teba, Antonino Di Raimo, 2025-08-05 This book peers into the concept of conservation under the framework of sustainability The world's architectural history is in danger due to a lack of understanding expertise and care Some monuments have already been lost and more are under threat Heritage needs to be well understood interpreted defined and managed for future generations as it provides communities and cultures with retrospection and contributes to recorded history Additionally it discusses the relationship between cultural heritage preservation and sustainable development as well as restoration efforts for tangible and intangible cultural heritage assets The book aims to assist professionals working in the field of heritage conservation whether it is cultural rural architectural tangible or intangible It stands to be a valuable resource for architects and engineers as well as for conservators archaeologists environmentalists and policy makers      **Cultural Heritage and Human Rights** Helaine Silverman, D. Fairchild Ruggles, 2008-10-14 Is there a universal right to the free expression and preservation of cultural heritage and if so where is that right articulated and how can it be protected No corner of today's world has escaped the effects of globalization for better or worse This volume addresses a deeply political aspect of heritage preservation and management as it relates to human rights      Human-Centered Built Environment Heritage Preservation Jeremy C. Wells, Barry L. Stiefel, 2018-09-20 Human Centered Built Environment Heritage Preservation addresses the question of how a human centred conservation approach can and should change practice For the most part there are few answers to this question because professionals in the heritage conservation field do not use social science research methodologies to manage cultural landscapes assess historical significance and inform the treatment of building and landscape fabric With few exceptions only academic theorists have explored these topics while failing to offer specific usable guidance on how the social sciences can actually be used by heritage professionals In exploring the nature of a human centred heritage conservation practice we explicitly seek a middle ground between the academy and practice theory and application fabric and meanings conventional and civil experts and orthodox and heterodox ideas behind practice and research We do this by positioning this book in a transdisciplinary space between these dichotomies as a way to give voice and respect to multiple perspectives without losing sight of our goal that heritage conservation practice should fundamentally benefit all people We believe that this approach is essential for creating an emancipated built heritage conservation practice that must successfully engage very different ontological and epistemological perspectives      A Research Agenda for Heritage Planning Stegmeijer, Eva, Veldpaus, Loes, 2021-09-07 This insightful Research Agenda examines the multidimensional relationships between heritage planning and pressing current societal challenges around climate identity and development Mapping future avenues for the field it suggests new approaches to executing studying and reflecting on heritage planning
