Ruin From The Air The Atomic Mission To Hiroshima:

Ruin from the Air Gordon Thomas, Max Morgan Witts, 1977 **Ruin from the Air** Gordon Thomas, Max Morgan Witts, 1990 **United States Air Force and Its Antecedents** James T. Controvich, Martin Gordon, 2004-06-24 This expanded and revised edition of the bibliography originally compiled for the United States Air Force Historical Research Agency is the most comprehensive listing of unofficial published histories of the United States Air Force and its antecedents. It covers the air force from its genesis as the US Army Signal Corps Aviation Section to the present. These titles are a rich source of information for anyone interested in the history of combat and peacetime operations of the Air Force. Researchers and libraries will find the organization of titles easy to use. Entries include private sponsored or unofficial histories often written by the unit historian, personal narratives, purely photographic or pictorial histories, route of battle maps, published or printed rosters, officially produced titles. This is an indispensable resource for military aviation historians, libraries with strong collections in military and air force history, and unit history collectors. It is also of special interest to genealogists as many unit histories contain rosters and photos of personnel. *The Manhattan Project and the Dropping of the Atomic Bomb* Aaron Barlow, 2019-11-08 This invaluable resource offers students a comprehensive overview of the Manhattan Project and the decision to drop the atomic bomb, with more than 80 in-depth articles on a variety of topics and dozens of key primary source documents. This book provides everything readers need to know about the Manhattan Project, the U.S. program that led to the development of the atomic bomb during World War II. It begins with a detailed introduction to the project and includes an alphabetical collection of relevant entries on such topics as the Enola Gay, the first aircraft to drop an atomic bomb; Enrico Fermi, creator of the first nuclear reactor; Hiroshima, the target of the first atomic bomb; and Robert Oppenheimer, director of the Manhattan Project. Dozens of primary sources include eyewitness accounts, government memos, letters, press releases, and other important documents relevant to the establishment and success of the Manhattan Project. A set of four essays written by prominent scholars address whether the United States was justified in dropping the atomic bomb on Japan. The book also includes a comprehensive chronology that reveals key moments related to the creation of the world's first nuclear weapon, as well as a bibliography of resources that points readers toward additional information on the Manhattan Project, nuclear weapons, and World War II. *The Hiroshima Men* Iain MacGregor, 2025-07-08 At 8:15 a.m. on August 6th, 1945, the Japanese port city of Hiroshima was struck by the world's first atomic bomb. Built in the US by the top secret Manhattan Project and delivered by a B-29 Superfortress, a revolutionary long-range bomber, the weapon destroyed large swaths of the city instantly, killing tens of thousands. The world would never be the same again. *The Hiroshima Men's* unique narrative recounts the decade-long journey towards this first atomic attack. It charts the race for nuclear technology before and during the Second World War, as the allies fought the axis powers in Europe, North Africa, China, and across the vastness of the Pacific, and is seen through the experiences of several key characters: General Leslie Groves, leader of the Manhattan Project, alongside

Robert Oppenheimer pioneering Army Air Force bomber pilot Colonel Paul Tibbetts II the mayor of Hiroshima Senkichi Awaya who would die alongside over eighty thousand of his fellow citizens and Pulitzer Prize winning novelist John Hersey who travelled to post war Japan to expose the devastation the bomb had inflicted upon the city and in a historic New Yorker article described in unflinching detail the dangers posed by its deadly after effect radiation poisoning This thrilling account takes the reader from the corridors of power in the White House and the Pentagon to the test sites of New Mexico from the air war above Germany to the Potsdam Conference of Truman Churchill and Stalin to the savage reconquest of the Pacific to the deadly firebombing air raids across the Japanese islands The Hiroshima Men also includes Japanese perspectives a vital aspect often missing from Western narratives to complete MacGregor s nuanced deeply human account of the bombing s meaning and aftermath Provided by publisher Atomic Bomb Island Don A. Farrell,2021-01-15 Atomic Bomb Island tells the story of an elite top secret team of sailors airmen scientists technicians and engineers who came to Tinian in the Marianas in the middle of 1945 to prepare the island for delivery of the atomic bombs then being developed in New Mexico to finalize the designs of the bombs themselves and to launch the missions that would unleash hell on Japan Almost exactly a year before the atomic bombs were dropped strategically important Tinian was captured by Marines because it was only 1 500 miles from Japan and its terrain afforded ideal runways from which the new B 29 bombers could pound Japan In the months that followed the U S turned virtually all of Tinian into a giant airbase with streets named after those of Manhattan Island a Marianas city where the bombs could be assembled the heavily laden B 29s could be launched and the Manhattan Project scientists could do their last work Don Farrell has done this story incredible justice for the 75th anniversary The book is a thoroughly researched beautifully illustrated mosaic of the final phase of the Manhattan Project from the Battle of Tinian and the USS Indianapolis to Hiroshima and Nagasaki *Hiroshima and Nagasaki* Angie Peterson Kaelberer,Andrew Langley,2017-07 Hoping to finally end World War II the United States dropped an atomic bomb on Hiroshima Japan on August 6 1945 Three days later the U S dropped another massive bomb on Nagasaki Japan The result was total devastation Within seconds of the blasts more than 120 000 men women and children died Thousands more would die from radiation sickness in the months to come The war was over but the ongoing fear of nuclear destruction had begun The Nuclear Muse John Canaday,2000 Canaday a poet and playwright who has been a Watson Fellow and a Starbuck Fellow in Poetry at Boston University analyzes a variety of texts produced by physicists before during and after WWII including Niels Bohr s The Quantum Postulate the technical lectures used for training at Los Alamos scientist s descriptions of their work and of the Trinity test and Leo Szilard s postwar novella The Voice of the Dolphins He looks at physicists use of figurative language in the development of quantum theory and examines the role played by the rhetorics of exploration and religion in the construction of the Los Alamos community Includes bandw historical photos Annotation copyrighted by Book News Inc Portland OR **Imagining Apocalypse** NA NA,2016-04-30 This volume brings together essays by specialists in different

disciplines on the cultural expression of apocalypse in particular in anglophone science fiction of the nineteenth and twentieth centuries Approaching these works from historical philosophical linguistic and literary perspectives the contributors examine the relationship between secular and spiritual apocalypse connecting the fiction and films to their historical moment Not surprisingly war recurs throughout this material as a critical turning point fulfilment of prophecy or prelude to a new age In particular the essays explore the issue of whether modern apocalypse is seen as an ending or a beginning considered under its political ethnic and gendered aspects Among the writers covered are H G Wells Olaf Stapledon and such contemporary figures as Michael Moorcock J G Ballard and Storm Constantine **Critical Thinking**
