Economics in the Long Run Theodore Rosenof,2000-11-09 Though understandably preoccupied with the immediate problems of the Great Depression the generation of economists that came to the forefront in the 1930s also looked ahead to the long term consequences of the crisis and proposed various solutions to prevent its recurrence Theodore Rosenof examines the long run theories and legacies of four of the leading members of this generation John Maynard Keynes of Great Britain who influenced the New Deal from afar Alvin Hansen and Gardiner Means who fought over the direction of New Deal policy and Joseph Schumpeter an opponent of the New Deal Rosenof explores the conflicts that arose among long run

theorists arguing that such disputes served eventually to set the stage for the emergence and domination of a short run Keynesian approach to economic policy that collapsed under the impact of 1970s stagflation Tracing the subsequent revival of long run theories Rosenof demonstrates their relevance to an understanding of the economy s problems over the past quarter century and to the current debate over public policy Originally published in 1997 A UNC Press Enduring Edition UNC Press Enduring Editions use the latest in digital technology to make available again books from our distinguished backlist that were previously out of print These editions are published unaltered from the original and are presented in affordable paperback formats bringing readers both historical and cultural value Economic Development in the Long Run
A.J. Youngson,2013-11-05 This book enlarges our understanding of economic development by bringing together items or aspects of historical experience relevant to the present day problems of developing countries by looking at the problems over a longer period than is usual in development economics so that the influence of underlying forces may be made evident and by comparing the experiences of different countries in similar situations A variety of countries are dealt with and most of the significant problems in development economics are covered in one context or another The authors of this symposium each an internationally acknowledged authority offer expert assessments of development as it has actually taken place The chapter by Professor Rosovsky shows what is significant what is peculiar and what could be imitated in Japan Professor Black takes the little studied case of Ireland and Dr Macpherson gives an informed and balanced account of Indian development This unique book was first published in 1972
