Rural Economy And Society In The Duchy Of Cornwall 1300 15:

Rural Economy and Society in the Duchy of Cornwall 1300-1500 John Hatcher, 1970-10-31 This study is centred on the Cornish manorial estates of the Duchy of Cornwall in the later Middle Ages and has been compiled from a very full and hitherto neglected series of records the completeness of which is perhaps unique for a lay estate Most aspects of the history of the estates have been recorded and those which differed from other regions of England have been stressed In order to place the Duchy estates within their regional context Dr Hatcher has studied a wide range of documents and produced a mass of new evidence concerning tin mining fishing trade towns and local industry in Cornwall and Devon He shows for example that agricultural prosperity in later medieval Cornwall followed an exceptional course and was determined by a series of interconnected changes within the regional economy with a much less direct and immediate causal link than is commonly assumed between declining population after 1349 and agricultural recession The intimate connexions between agriculture and industry and commerce are additionally emphasized by the manifold business interests of leading Duchy tenants

Agriculture and Rural Society After the Black Death Ben Dodds, Richard Britnell, 2009-04 With special emphasis on the period following the Black Death this new collection of essays explores agriculture and rural society during the late Middle Ages Combining a broad perspective on agrarian problems such as depopulation and social conflict with illustrative material from detailed local and regional research this compilation demonstrates how these general problems were solved within specific contexts The contributors supply detailed studies relating to the use of the land the movement of prices the distribution of property the organization of trade and the cohesion of village society among other issues New research on regional development in medieval England and other European countries is also discussed The Burdens of Disease J. N. Hays, 2009-10-15 In this sweeping approach to the history of disease the author a historian chronicles perceptions and responses to plague and pestilence over two thousand years of Western history He frames disease as a multidimensional construct situated at the intersection of history politics culture and medicine and rooted in mentalities and social relations as much as in biological conditions of pathology He shows how diseases affect social and political change reveal social tensions and are mediated both within and outside the realm of scientific medicine After the Black Death Mark Bailey, 2021-02-11 The Black Death of 1348-9 is the most catastrophic event and worst pandemic in recorded history After the Black Death offers a major reinterpretation of its immediate impact and longer term consequences in England After the Black Death reassesses the established scholarship on the impact of plague on fourteenth century England and draws upon original research into primary sources to offer a major re interpretation of the subject It studies how the government reacted to the crisis and how communities adapted in its wake It places the pandemic within the wider context of extreme weather and epidemiological events the institutional framework of markets and serfdom and the role of law in reducing risks and conditioning behaviour The government's response to the Black Death is reconsidered in order to cast new light on the

Peasants Revolt of 1381 By 1400 the effects of plague had resulted in major changes to the structure of society and the economy creating the pre conditions for England s role in the Little Divergence whereby economic performance in parts of north western Europe began to move decisively ahead of the rest of the continent After the Black Death explores in detail how a major pandemic transformed society and in doing so elevates the third quarter of the fourteenth century from a little understood paradox to a critical period of profound and irreversible change in English and global history **Agricultural Economics Research** ,1970 *The Medieval Economy and Society* Michael Moïssey Postan,1973 Charity and Community in Medieval Cambridge Miri Rubin,2002-05-09 This is a detailed study of the forms in which charitable giving was organised in medieval Cambridge and Cambridgeshire unravelling the economic and demographic factors which created the need for relief as well as the forms in which the community offered it Bodmin Moor: An archaeological survey: Volume 1 Nicholas Johnson,Peter Rose,2014-06-30 Year by year encroachment in the 20th century for cultivation or tree planting provided the stimulus for the most extensive survey ever undertaken of the archaeological monuments of Bodmin Moor a previously little disturbed landscape rich in surviving structural evidence of the many ways from the Bronze Age to the post medieval period in which people settled and exploited the Moor and its surroundings The survey is remarkable not only for the extent of the area examined but also for the number of monuments newly identified in the course of the work Supplementing the survey text are detailed line drawings plans aerial photographs and large scale maps **Mills in the Medieval Economy** John Langdon,2004-07 This book examines the evolution of mills whether powered by water wind animals or humans during an important era of English history It focuses not only on the structures themselves but also on the people who acted as entrepreneurs workers and customers for the industry Together they created one of the most recognizable and enduring features of medieval society *Women in the Medieval English Countryside* Judith M. Bennett,1987-03-12 Unlike most histories of European women which have typically focused on the 19th and 20th century elite this study reconstructs the public lives of peasant women and men during the six decades before the Black Death of 1348 49 Drawing on the extensive records of the forest manor of Brigstock Judith Bennett challenges the myth of a golden age of equality for medieval men and women Instead she ably shows that women faced profound political legal economic and social disadvantages in their dealings with men These disadvantages stemmed more from women s household status as dependents of their husbands than from any notion of female inferiority consequently adolescents and widows participated much more actively than wives in the public life of Brigstock Women in the Medieval English Countryside demonstrates not only how enduring the subordination of women has been throughout English history but also how firmly that subordination has been rooted in the conjugal household
