Rural Economy And Society:

Locality and Rurality Tony Bradley, Philip Lowe, 1984 **Rural Economy and Society Series** ,1984 **Agrarian Puerto Rico** César J. Ayala, Laird W. Bergad, 2020-01-30 Challenges dominant interpretations of colonialism's impact on the economy and social structuring of a US owned Caribbean colony Proceedings of the New Zealand Rural Economy and Society Study Group Seminar New Zealand Rural Economy and Society Study Group. Seminar, 1986 **The Rural Economy** ,1980 *Peasants Into Farmers?* P. C. M. Hoppenbrouwers, J. L. van Zanden, 2001 Since his first article in 1976 the American historian Robert P Brenner has tried to come to terms with an issue first raised two centuries ago how can we explain the differences in growth patterns of North Western European countries in the transition from feudalism to capitalism In a frontal attack on both the homeostatic demographic and commercialisation models Brenner traced the roots of the divergent evolutions back to rural and feudal social property relations In the debate that immediately followed Brenner's first article and in subsequent exchanges the Low Countries were significantly neglected although areas such as Flanders and Holland played a decisive role in the economic development of Europe This was partly because of too few publications in international languages on the relevant Dutch rural history This important book edited by two of the most respected Dutch rural historians and with contributions by several distinguished historians seeks to fill this lacuna It draws upon substantial research and confronts the Brenner thesis with new results and hypotheses and it contains a powerful and detailed response by Brenner himself *The Geography of Rural Change* Brian W. Ilbery, 2014-09-11 The Geography of Rural Change provides a thorough examination of the processes and outcomes of rural change as a result of a period of major restructuring in developed market economies After outlining the main dimensions of rural change the book progresses from a discussion of theoretical insights into rural restructuring to a consideration of both the extensive use of rural land and the changing nature of rural economy and society The text places an emphasis on relevant principles concepts and theories of rural change and these are supported by extensive case study evidence drawn from different parts of the developed world The Geography of Rural Change is written for undergraduates taking courses in human geography agricultural geography rural geography rural sociology planning and agricultural economics **Rural Economy and Country Life in the Medieval West** Georges Duby, 1998-01-29 One of the most important imaginative solidly documented well written books of medieval history that I have ever read It offers a unique combination of synthetic power and analytic perception of bold judgment and Cartesian doubt of hard economic facts and subtle psychological considerations Agrarian Puerto Rico César J. Ayala, Laird W. Bergad, 2020-01-30 Fundamental tenets of colonial historiography are challenged by showing that US capital investment into this colony did not lead to the disappearance of the small farmer Contrary to well established narratives quantitative data show that the increasing integration of rural producers within the US market led to differential outcomes depending on pre existing land tenure structures capital requirements to initiate production and demographics These new data suggest that

the colonial economy was not polarized into landless Puerto Rican rural workers on one side and corporate US capitalists on the other. The persistence of Puerto Rican small farmers in some regions and the expansion of local property ownership and production disprove this socioeconomic model. Other aspects of extant Puerto Rican historiography are confronted in order to make room for thorough analyses and new conclusions on the economy of colonial Puerto Rico during the early twentieth century.

Rationalizing Rural Area Classifications for the Economic Research Service

National Academies of Sciences, Engineering, and Medicine, Division of Behavioral and Social Sciences and Education, Committee on National Statistics, 2016-02-05

The U S Department of Agriculture Economic Research Service (USDA ERS) maintains four highly related but distinct geographic classification systems to designate areas by the degree to which they are rural. The original urban-rural code scheme was developed by the ERS in the 1970s. Rural America today is very different from the rural America of 1970 described in the first rural classification report. At that time, migration to cities and poverty among the people left behind was a central concern. The more rural a residence, the more likely a person was to live in poverty, and this relationship held true regardless of age or race. Since the 1970s, the interstate highway system was completed and broadband was developed. Services have become more consolidated into larger centers. Some of the traditional rural industries, farming and mining, have prospered, and there has been rural amenity-based migration. Many major structural and economic changes have occurred during this period. These factors have resulted in a quite different rural economy and society since 1970. In April 2015, the Committee on National Statistics convened a workshop to explore the data estimation and policy issues for rationalizing the multiple classifications of rural areas currently in use by the Economic Research Service (ERS). Participants aimed to help ERS make decisions regarding the generation of a county rural-urban scale for public use, taking into consideration the changed social and economic environment. This report summarizes the presentations and discussions from the workshop.
