Higher Education United States. Congress. House. Committee on Government Operations, 1965 Religion Vs. Science

Elaine Howard Ecklund, Christopher P. Scheitle, 2018 At the end of a five year journey to find out what religious Americans think about science Ecklund and Scheitle emerge with the real story of the relationship between science and religion in American culture Based on the most comprehensive survey ever done representing a range of religious traditions and faith positions Religion vs Science is a story that is more nuanced and complex than the media and pundits would lead us to believe The way religious Americans approach science is shaped by two fundamental questions What does science mean for the existence and activity of God What does science mean for the sacredness of humanity How these questions play out as individual believers think about science both challenges stereotypes and highlights the real tensions between religion and science Ecklund and Scheitle interrogate the widespread myths that religious people dislike science and scientists and deny scientific theories Religion vs Science is a definitive statement on a timely popular subject Rather than a highly conceptual approach to historical debates philosophies or personal opinions Ecklund and Scheitle give readers a facts on the ground empirical look at what religious Americans really understand and think about science **The American Academic**
