Governing Knowledge Commons Brett M. Frischmann, Michael J. Madison, Katherine Jo Strandburg, 2014 Knowledge commons describes the institutionalized community governance of the sharing and in some cases creation of information science knowledge data and other types of intellectual and cultural resources It is the subject of enormous recent interest and enthusiasm with respect to policymaking about innovation creative production and intellectual property Taking that enthusiasm as its starting point Governing Knowledge Commons argues that policymaking should be based on evidence and

a deeper understanding of what makes commons institutions work It offers a systematic way to study knowledge commons borrowing and building on Elinor Ostrom's Nobel Prize winning research on natural resource commons It proposes a framework for studying knowledge commons that is adapted to the unique attributes of knowledge and information describing the framework in detail and explaining how to put it into context both with respect to commons research and with respect to innovation and information policy Eleven detailed case studies apply and discuss the framework exploring knowledge commons across a wide variety of scientific and cultural domains

Defending Science - within Reason

Susan Haack, 2011-03-30 Sweeping in scope penetrating in analysis and generously illustrated with examples from the history of science this new and original approach to familiar questions about scientific evidence and method tackles vital questions about science and its place in society Avoiding the twin pitfalls of scientism and cynicism noted philosopher Susan Haack argues that fallible and flawed as they are the natural sciences have been among the most successful of human enterprises valuable not only for the vast interlocking body of knowledge they have discovered and not only for the technological advances that have improved our lives but as a manifestation of the human talent for inquiry at its imperfect but sometimes remarkable best This wide ranging trenchant and illuminating book explores the complexities of scientific evidence and the multifarious ways in which the sciences have refined and amplified the methods of everyday empirical inquiry articulates the ways in which the social sciences are like the natural sciences and the ways in which they are different disentangles the confusions of radical rhetoricians and cynical sociologists of science exposes the evasions of apologists for religious resistance to scientific advances weighs the benefits and the dangers of technology tracks the efforts of the legal system to make the best use of scientific testimony and tackles predictions of the eventual culmination or annihilation of the scientific enterprise Writing with verve and wry humor in a witty direct and accessible style Haack takes readers beyond the Science Wars to a balanced understanding of the value and the limitations of the scientific enterprise

Transparency and

Accountability in Science and Politics K. Andersson, 2008-07-10 This book challenges the role of scientists in policy making and the idea of deliberative democracy The author argues that awareness must increase among both politicians and the citizens who elect them We must revitalise the decision making processes in representative democracy The book proposes new institutional structures

The Ethics of Science

David B. Resnik, 2005-08-12 An essential introduction to the study of ethics in science and scientific research for students and professionals alike

Susan Haack Cornelis De

Waal, 2011-04-06 The book on Susan Haack's philosophy is a welcome achievement in a grand tradition as in the series of volumes of The Library of Living Philosophers Here too the multifaceted contributions by a distinguished philosopher are analyzed in turn by nearly a score of feisty scholars each of whom then is answered by Susan Haack's illuminating reply Altogether a feast GERALD HOLTON Mallinckrodt Research Professor of Physics Research Professor of History of Science Harvard University Author of Thematic Origins of Scientific Thought Kepler to Einstein and Science and Anti Science As is

well known Susan Haack combines the fullest technical professionalism in philosophy with a commitment to vigorous participation in debate on large public issues Her special gift is her ability to bring the former to bear on the latter This well conceived collection brings out the force and energy of her thinking

LORD ANTHONY QUINTON Former President of Trinity College Oxford Former Chairman of the British Library Board and the author of *Hume* In this critical appraisal of the work of philosopher Susan Haack editor Cornelis de Waal has assembled sixteen original essays from outstanding international contributors together with responses from Haack on the points raised The contributors address most of Haack's key publications from her early writings on metaphysics to her most recent work in the philosophy of science and the philosophy of law Topics include the revisability of logic the role of emotion in reasoning scientific integrity postmodernism and the law the relation of science to religion preferential hiring multiple aspects of Haack's foundationalism and her crossword analogy The volume also includes an extensive interview with Haack which traces the development of her thought and a complete bibliography of her work For anyone seeking a better understanding of the work of this important philosopher this unique collection offers many invaluable insights

The Commodification of Academic Research Hans Radder, 2010-09-05 Selling science has become a common practice in contemporary universities This commodification of academia pervades many aspects of higher education including research teaching and administration As such it raises significant philosophical political and moral challenges This volume offers the first book length analysis of this disturbing trend from a philosophical perspective and presents views by scholars of philosophy of science social and political philosophy and research ethics The epistemic and moral responsibilities of universities whether for profit or nonprofit are examined from several philosophical standpoints The contributors discuss the pertinent epistemological and methodological questions the sociopolitical issues of the organization of science the tensions between commodified practices and the ideal of science for the public good and the role of governmental regulation and personal ethical behavior In order to counter coercive and corruptive influences of academic commodification the contributors consider alternatives to commodified research and offer practical recommendations for establishing appropriate research standards methodologies and institutional arrangements and a corresponding normative ethos

Biotechnology, Patents and Morality Sigrid Sterckx, 2017-11-01 This title was first published in 2000 This work documents an international and interdisciplinary workshop on the ethical aspects of the patenting of biotechnological inventions including genes plants and animals The public perception is discussed along with how these perceptions relate to ethical social and cultural factors The legal framework in Europe is laid out by several experts in the field of patent law and the situation in the US is also

briefly described This edition also includes a general discussion of three important theories called upon to justify the patent system the natural rights argument the distributive justice argument and the utilitarian argument The chapter about the European Directive on the legal protection of biotechnological inventions has been updated A selection of provisions from the August 1997 draft as well as the final text of the Directive as adopted on 12 May 1998 are discussed and commented upon The patent provisions of the TRIP s Agreement the Agreement on Trade Related aspects of Intellectual Property rights concluded in 1994 as an Annex to the Agreement Establishing the World Trade Organization are also discussed and criticized paying particular attention to the implications for biotechnology patents Finally the question is asked whether the developing countries stand to gain anything from TRIPs A look at the results of empirical research conducted by commentators on the economics of patenting reveals that the new patent regime may prove to entail significant costs for the developing countries This second edition also contains material on the EU Directive on biotechnology patents adopted in May 1998 justificatory theories of the patent system and the TRIP s agreement on Trade Related aspects of Intellectual Property rights concluded in the GATT WTO framework Intellectual Property and Biotechnology Matthew Rimmer,2008-01-01 Dr Rimmer s book is a marvellous introduction to a crucial topic of our time He writes engagingly provocatively and always with good humour A highly technical and complex area of law has been reduced to clear descriptions and searching analysis Truly this is an important book on an essential topic that will help define the ethics of a future that includes nothing less than the future of our species From the foreword by the Hon Justice Michael Kirby AC CMG the High Court of Australia the author has done an excellent job by explaining the subject in an open and accessible manner This book is a timely and very thought provoking analysis of patent law and biotechnology The book is a unique theoretical contribution to the controversial public debate over commercialization of biological inventions there is an extensive bibliography a valuable resource for further reading The book will be of prime interest to lawyers and patent attorneys scientists and researchers business managers and technology transfer specialists Journal of Intellectual Property Rights Rimmer s book is highly recommended for anyone interested in the issues and debate related to biological inventions regardless of which side the reader is on Stefan M Miller Journal of Commercial Biotechnology this book gives an excellent account of the most celebrated biotechnology cases from three continents and for this alone is to be thoroughly recommended David Rogers European Intellectual Property Review Rimmer has put a great deal of thought and effort into this series of chapters For those looking at how to reform direct and develop laws in relation to biotechnology this book is brimming with ideas suggestions and recommendations of what to do next Rebecca Halford Harrison Chartered Institute of Patent Attorneys an excellent introduction to a wide range of legal thinking in an increasingly controversial and relevant area to humankind Sharon Givoni Australian Intellectual Property Law Bulletin Rimmer s new book is a timely and very thought provoking analysis of patent law and biotechnology and asks a very serious question can a 19th century patent system adequately deal with a 21st century industry Kate McDonald Australian Life

Scientist This book documents and evaluates the dramatic expansion of intellectual property law to accommodate various forms of biotechnology from micro organisms plants and animals to human genes and stem cells It makes a unique theoretical contribution to the controversial public debate over the commercialization of biological inventions The author also considers the contradictions between the Supreme Court of Canada rulings in respect of the Harvard oncomouse and genetically modified canola He explores law policy and practice in both Australia and New Zealand in respect to gene patents and non coding DNA This study charts the rebellion against the European Union Biotechnology Directive particularly in respect of Myriad Genetics BRCA1 and BRCA2 patents and stem cell patent applications The book also considers whether patent law will accommodate frontier technologies such as bioinformatics haplotype mapping proteomics pharmacogenomics and nanotechnology Intellectual Property and Biotechnology will be of prime interest to lawyers and patent attorneys scientists and researchers business managers and technology transfer specialists *Evidence Matters* Susan Haack,2014-07-28 Susan Haack brings her distinctive work in theory of knowledge and philosophy of science to bear on real life legal issues *Teaching Scientific Inquiry*,2008-01-01 What are scientific inquiry practices like today How should schools approach inquiry in science education Teaching Science Inquiry presents the scholarly papers and practical conversations that emerged from the exchanges at a two day conference of distinctive North American science studies and learning science scholars The conference goal forge consensus views about images of inquiry that could inform teaching science through inquiry The conference outcomes recommendations for Enhanced Scientific Method Extended Immersion Units of Instruction and Teacher Professional Development Models The edited volume will appeal to individuals interested in science learning as well as the design of learning environments Scholars policy makers teacher educators and teachers will find this volume s recommendations provocative and insightful Twentieth century scientific advances with new tools technologies and theories have changed what it means to do science to engage in scientific inquiry and to describe science as a way of knowing Advances in science studies disciplines are updating views about the nature of scientific inquiry Advances in the cognitive and learning sciences are altering understandings about knowledge acquisition meaning making and conditions for school learning The conference papers commentaries and panel reflections advance novel views about both children s learning and the nature of science Responsible Genetics A. Nordgren,2013-03-14 This book addresses well known issues the ethical legal and social implications of human genetics but does so from an unusual perspective the perspective of the scientific community itself In distinction to what is common in the ELSI literature the book also discusses bioethical method A new kind of casuistry is developed on the basis of the empirical findings of cognitive semantics It will be of interest to philosophers bioethicists geneticists and policymakers **Diversity, Innovation and Clusters** Irène Bernhard,Urban Gråsjö,Charlie Karlsson,2020-05-29 Increased emphasis on the links between regional diversity and regional knowledge innovation and entrepreneurship highlights the need for a focus on the spatial aspects of these multifaceted

dynamic relationships in order to improve our understanding By means of a conceptual approach this timely book illustrates the links between innovation and economic development through the role of space This thought provoking book addresses the questions regarding diversity innovation and clusters that require further investigation and analysis **Public Science, Private Interests** Janet Atkinson-Grosjean, 2006-01-01 Janet Atkinson Grosjean's *Public Science Private Interests* is the first book length study of NCEs and offers an assessment of the long term impact of the erasure between public institutions and private enterprise **Technologies of Knowing** John Willinsky, 2000-02-15 In this age of ever more powerful computers our ability to collect and spread knowledge is growing at an exponential rate Far from liberating humanity our information exasperation as John Willinsky describes it in this pathbreaking book has made our ability to reach conclusions about the world around us all the more difficult With little order to guide us through the mountains of new information in the Internet the public as well the sciences that have amassed such knowledge has little confidence in its potential to change the world for the better For example the overload of conflicting new findings in breast cancer research has so paralyzed progress that some researchers now recommend that women stop examining themselves to avoid the psychological burden of monthly searches for this deadly disease While some critics have condemned computers and the Internet for putting us in this age of overflow and still others have praised them for their own sake Willinsky takes a middle ground Using the fictitious Automata Data Corporation as the vehicle for an ingenious thought experiment he plays out what would happen if all information collected from social science research were centralized catalogued and processed by one company serving the public interest Willinsky describes in great detail how such an entity could work to fulfill the promises of the human sciences and technology Sure to stir debate *Technologies of Knowing* offers a starting point from which to rethink our understanding of our emerging wired world and adds new insight into how to make the uses of knowledge more democratic **Economic Integration and Social Responsibility** François Bourguignon, Pierre Jacquet, Boris Pleskovic, 2007 The Little Data Book on Private Sector Development 2007 is one of a series of pocket sized books intended to provide a quick reference to development data on different topics The Little Data Book on Private Sector Development 2007 provides data for more than 20 key indicators on business environment and private sector development in a single page for each of the World Bank member countries and other economies with populations of more than 30 000 These more than 200 country pages are supplemented by aggregate data for regional and income groupings The data topics include economic and social context business environment private sector investment finance and banking infrastructure It is intended as a quick reference for users of World Development Indicators WDI Online and the Atlas of Global Development The book also includes data from the World Bank's Doing Business project and Enterprise Surveys **Evidence and Inquiry** Susan Haack, 2009-12-02 In this important new work Haack develops an original theory of empirical evidence or justification and argues its appropriateness to the goals of inquiry In so doing Haack provides detailed critical case studies of Lewis's foundationalism Davidson's and Bonjour's coherentism
