Elements of Scientific Inquiry Eric Martin, Daniel N. Osherson, 1998 Eric Martin and Daniel N Osherson present a theory of inductive logic built on model theory Their aim is to extend the mathematics of Formal Learning Theory to a more general setting and to provide a more accurate image of empirical inquiry The formal results of their study illuminate aspects of scientific inquiry that are not covered by the commonly applied Bayesian approach

A Science Strategy for the Exploration of Europa National Research Council, Division on Engineering and Physical Sciences, Space Studies Board, Commission on Physical Sciences, Mathematics, and Applications, Committee on Planetary and Lunar Exploration, 1999-12-22 Since its discovery in 1610 Europa one of Jupiter s four large moons has been an object of interest to astronomers and planetary scientists Much of this interest stems from observations made by NASA s Voyager and Galileo

spacecraft and from Earth based telescopes indicating that Europa's surface is quite young with very little evidence of cratering and made principally of water ice. More recently theoretical models of the jovian system and Europa have suggested that tidal heating may have resulted in the existence of liquid water and perhaps an ocean beneath Europa's surface. NASA's ongoing Galileo mission has profoundly expanded our understanding of Europa and the dynamics of the jovian system and may allow us to constrain theoretical models of Europa's subsurface structure. Meanwhile since the time of the Voyagers there has been a revolution in our understanding of the limits of life on Earth. Life has been detected thriving in environments previously thought to be untenable around hydrothermal vent systems on the seafloor deep underground in basaltic rocks and within polar ice. Elsewhere in the solar system including on Europa environments thought to be compatible with life as we know it on Earth are now considered possible or even probable. Spacecraft missions are being planned that may be capable of proving their existence. Against this background the Space Studies Board charged its Committee on Planetary and Lunar Exploration COMPLEX to perform a comprehensive study to assess current knowledge about Europa outline a strategy for future spacecraft missions to Europa and identify opportunities for complementary Earth based studies of Europa. See the preface for a full statement of the charge.

Review of NASA's Solid-Earth Science Strategy National Research Council, Division on Earth and Life Studies, Board on Earth Sciences and Resources, Committee to Review NASA's Solid-Earth Science Strategy, 2004-09-13. The report reviews NASA's solid earth science strategy placing particular emphasis on observational strategies for measuring surface deformation high resolution topography surface properties and the variability of the earth's magnetic and gravity fields. The report found that NASA is uniquely positioned to implement these observational strategies and that a number of agency programs would benefit from the resulting data. In particular the report strongly endorses the near term launch of a satellite dedicated to L band InSAR measurements of the land surface which is a key component of the U.S. Geological Survey's hazards mitigation program and the multi agency EarthScope program.

Fail-Safe Strategies for Science and Literacy Sandra Mirabelli, 2023-10-17. Effective teaching can be found where science and literacy overlap. This book helps teachers streamline busy schedules by focusing on cognitive skills shared by science and language arts. Designed to help build teacher confidence it offers the background and insights teachers need to support students as they make sense of science content through language arts study. This unique approach pairs thinking routines from literacy: Observe and Wonder, Predict and Infer, Sort and Categorize, Analyze and Interpret, and Conclude and Apply with hands on science activities. The engaging strategies offer a fail safe way for students to build knowledge and skills across the curriculum.
