The Knowledge Society Gernot Böhme,Nico Stehr,2012-12-06 The original essays collected here under the general title of The Knowledge Society were first commissioned for a conference held in the late fall of 1984 at the Technische Hochschule Darmstadt West Germany The conference in Darmstadt saw a larger number of contributions presented than could be

accommodated in this edition of the Sociology of the Sciences Yearbook. However, all contributions were important and affected those published in this collection. We are therefore grateful to all participants of the Darmstadt conference for their presentations and for their intense, useful as well as thoughtful discussion of all papers. Those chosen for publication in the Yearbook and those undoubtedly to be published elsewhere have all benefitted considerably from our discussions in Darmstadt, which also included a number of the members of the editorial board of the Yearbook. In addition, we are pleased that the authors were able to read and comment further on each other's papers prior to publication. As is the case in every endeavor of this kind, we have incurred many debts and are only able to acknowledge these at this point publicly while expressing our sincere thanks and appreciation for all the intellectual support and the considerable labor invested by a number of persons in the realization of the collection.

The Soviet Polity in the Modern Era Erik P. Hoffmann, Robbin Frederick Laird, Politics, Technology, and Bureaucracy in South Asia Malik, 2022-05-09 *Information, Innovation and Impacts* John de la Mothe, Gilles Paquet, 2012-12-06. Information Innovation and Impacts is a joint project between the Program of Research in International Management and Economy PRIME at the University of Ottawa and Statistics Canada, which brings together economic, social, and statistical views of the impacts of the innovative uses of information. It examines the costs as well as the benefits of rapidly expanding availability of data, information, and of codified knowledge, and it provides suggestions for future work and research. This project fits into an ongoing research program at Statistics Canada to develop indicators for science and technology in a more coherent manner, and it fits into the research program of PRIME to better understand the dynamics of innovation in an information economy. Together, Statistics Canada and PRIME strive to tell the story of the activities in S-T systems, their interactions, and the outcomes as actors go about the generation, transmission, or mediation of knowledge, information, and of data as part of the effective functioning of the system.

Culture's Consequences Geert Hofstede, 1984. In his bestselling book *Culture's Consequences*, Geert Hofstede proposed four dimensions on which the differences among national cultures can be understood: Individualism, Power Distance, Uncertainty Avoidance, and Masculinity. This volume comprises the first in-depth discussion of the masculinity dimension and how it can help us to understand differences among cultures. The book begins with a general explanation of the masculinity dimension and discusses how it illuminates broad features of different cultures. The following parts apply the dimension more specifically to gender and gender identity, sexuality, and sexual behaviour, and religion, probably the most influential variable of all. Hofstede closes the book.

Contemporary Issues in African Administration and Development Politics, 1990 **The Culture and Power of Knowledge** Nico Stehr, Richard V. Ericson, 2013-05-08. The Culture and Power of Knowledge Science As Power Stanley Aronowitz. Science has established itself as not merely the dominant but the only legitimate form of human knowledge. By tying its truth claims to methodology, science has claimed independence from the influence of social and historical conditions. Here, Aronowitz asserts that the norms of science are by no means self-evident and that

science is best seen as a socially constructed discourse that legitimates its power by presenting itself as truth *Science and Technology in Economic Growth* B R Williams,1973-01-01 **Volta** Giuliano Pancaldi,2018-06-05 Giuliano Pancaldi sets us within the cosmopolitan cultures of Enlightenment Europe to tell the story of Alessandro Volta the brilliant man whose name is forever attached to electromotive force Providing fascinating details many previously unknown Pancaldi depicts Volta as an inventor who used his international network of acquaintances to further his quest to harness the power of electricity This is the story of a man who sought recognition as a natural philosopher and ended up with an invention that would make an everyday marvel of electric lighting Examining the social and scientific contexts in which Volta operated as well as Europe s reception of his most famous invention Volta also offers a sustained inquiry into long term features of science and technology as they developed in the early age of electricity Pancaldi considers the voltaic cell or battery as a case study of Enlightenment notions and their consequences consequences that would include the emergence of the scientist at the expense of the natural philosopher Throughout Pancaldi highlights the complex intellectual technological and social ferment that ultimately led to our industrial societies In so doing he suggests that today s supporters and critics of Enlightenment values underestimate the diversity and contingency inherent in science and technology and may be at odds needlessly Both an absorbing biography and a study of scientific and technological creativity this book offers new insights into the legacies of the Enlightenment while telling the remarkable story of the now ubiquitous battery
