Chemistry in America 1876-1976 A. Thackray,J.L. Sturchio,P.T. Carroll,R.F Bud,2012-12-06 This study is an outgrowth
of our interest in the history of modern chemistry The paucity of reliable quantitative knowledge about past science was
brought home forcibly to us when we undertook a research seminar in the comparative history of modern chemistry in
Britain Germany and the United States That seminar which took place at the University of Pennsylvania in the spring of 1975
was paralleled by one devoted to the work of the Annales School The two seminars together catalyzed the attempt to
construct historical measures of change in aspects of one science or chemical indicators The present volume displays our
results Perhaps our labors may be most usefully compared with the work of those students of medieval science who devote
their best efforts to the establishment of texts Only when acceptable texts have been constructed from fragmentary and
corrupt sources can scholars move on to the more satisfying business of making history So too in the modern period a
necessary preliminary to the full history of any scientific profession is the establishing of reliable quantitative information in
the form of statistical series This volume does not offer history Instead it provides certain element indicators that may be
useful to individuals interested in the history of American chemistry and chemical industry and suggestive for policy
