Universal Jurisdiction: The Sierra Leone Profile Justice Bankole Thompson, 2015-03-12 The doctrine of universal jurisdiction has evolved throughout modern times in the context of global criminal justice as a paramount agent of combating impunity emanating from international criminality Sierra Leone as a member of the international community and the United Nations has in recent times been a pioneer in the progressive application and development of international criminal law in the African region Despite this role the country s profile both in terms of the incorporation and application of the doctrine of universal jurisdiction is deficient in several major respects falling far short of its dual international obligation not to provide safe havens from justice for perpetrators of international crimes and to combat impunity from such criminogenic acts Hence a compelling reason for the author to write this book was to provide a seminal scholarly work on the subject articulating the existing state of the law in Sierra Leone and highlighting the deficiencies in the law and factors inhibiting the exercise of universal jurisdiction in this UN member state It was also to propose necessary substantive and procedural law reforms in the state s jurisprudence on the subject The book is recommended reading for practitioners and scholars in international criminal law and related disciplines Its accessibility is highly enhanced by relevant tables and summaries of each chapter Justice Rosolu J B Thompson is Professor Emeritus of Criminal Justice Studies Eastern Kentucky University USA He was a member of and Presiding Judge in Trial Chamber I of the Special Court for Sierra Leone

Sustainable Development Rumen Gechev, 2005 The criteria for sustainable development have become a decisive factor in the formulation and assessment of economic policy models By its nature sustainable development is a multidimensional category therefore it

requires an interdisciplinary approach This study is focused on the economic aspects of sustainable development However the analysis includes the interdependences of the noneconomic dimensions The author proposes a new definition for sustainable development that incorporates those dimensions and suggests a new GDP matrix that better integrates the quantitative and the qualitative parameters of the economic output including its effect on the environmental equilibrium

Advances in Visual Information Systems Robert Laurini, 2000-10-18 Presently in our world visual information dominates The turn of the millenium marks the age of visual information systems Enabled by picture sensors of all kinds turning digital visual information will not only enhance the value of existing information it will also open up a new horizon of previously untapped information sources There is a huge demand for visual information access from the consumer As well the handling of visual information is boosted by the rapid increase of hardware and Internet capabilities Advanced technology for visual information systems is more urgently needed than ever before not only new computational methods to retrieve index compress and uncover pictorial information but also new metaphors to organize user interfaces Also new ideas and algorithms are needed which allow access to very large databases of digital pictures and videos Finally we should not forget new systems with visual interfaces integrating the above components into new types of image video or multimedia databases and hyperdocuments All of these technologies will enable the construction of systems that are radically different from conventional information systems Many novel issues will need to be addressed query formulation for pictorial information consistency management thereof indexing and assessing the quality of these systems Historically the expression Visual Information Systems can be understood either as a system for image information or as visual system for any kind information
