K. Britton,Arthur Woodward,Marilyn Binkley,2012-11-12 It is surprising that there is so little research on textbooks given  
their centrality to teaching and learning in elementary and secondary schools Textbooks have become a focus of political and  
cultural controversy advocating a multicultural curriculum that has sparked some vigorous protests Research is absent in  
this debate therefore questions of legitimate knowledge the role of textbooks textbook design policy selection issues and  
economic issues concerning the marketplace are not part of the current debate Without insights of research on considerate  
text mentioning illustrations and so forth the current controversy will result in publishers responding to demands for more  
content not less thus textbooks will become compendia of information that on the surface satisfy everyone This volume  
demonstrates how research on important issues relative to textbook design can advance our knowledge about what makes  
textbooks effective learning tools and thus inform policymakers publishers and those involved in textbook selection  
Representing pure and applied approaches researchers present papers on the quality of writing the role of questions the role  
of pictures and illustrations and the role of auxiliary materials in the design of effective textbooks The chapters provide  
insight into research and its application to textbook design and improvement stimulating others to follow this lead
