Focusing on English from Alfred the Great to the present Tim Machan offers a fresh perspective on the history of language He reveals amusing and sometimes disconcerting aspects of our linguistic and social behavior and suggests that anxiety about language has sometimes allowed us to avoid the issues we really find disturbing when speakers of English worry over grammar sounds or words the real source of their anxiety is often not language at all but issues like immigration or social instability Drawing on an array of evidence from archives literature history polemics and the press as well as centuries of legislation Tim Machan uncovers the perennial nature of concerns about the poverty and purity of English There has never been a time he shows when we weren't worried about the corruption of language and its apparent connections with educational standards the morality of youth the integrity of society and the identity of our nations This is a fascinating story told here in consummate fashion combining insight and anecdote and learning with wit a book for everyone interested in languages and the people who speak them

To Define and Inform Saihong Li Rasmussen, 2010-05-11 To Inform and Define An Analysis of Information Provided in Dictionaries Used by Learners of English in China and Denmark presents a masterly synthesis of lexicographical theory in relation to bilingual and learner's dictionaries and advances a radical argument about how such dictionaries are used and how they should be improved for the convenience of students By tracing the history of the terms semantic and pragmatic in linguistics and philosophy Saihong Li shows the weakness of any conceptual distinction between them She goes on to demonstrate how inappropriate these terms are for thinking about the ways in which words are defined and explained in dictionaries The theoretical argument is supported by detailed and comparative empirical research learners of English as a second language in both China and Denmark were interviewed about their experiences as users of standard learner's dictionaries The results are presented in tabular form and their interpretation is statistically informed This is a path breaking study Saihong Li makes an important contribution to lexicographical theory and advances a sophisticated methodology for the comparative study of English language learning on an international scale and in the global marketplace of learner's dictionaries Her work will be of great value for language teachers lexicographers and students of interpretation translation and language pedagogies To Inform and Define should also attract serious attention from editors and publishers of learner's dictionaries
