Class Rules James McEnaney, 2021-09-08 Every single person in Scotland has some kind of stake in the effectiveness of the nation's schools so in writing this book my goal was to explain the intricacies and inconsistencies of the system and to explore its strengths and weaknesses in a way that would make sense to as many people as possible How much do we really know about the state of Scottish education Why do inequalities continue to dictate the school experiences of children across the country What can be done to address the problems in the school system James McEnaney does what he claims pundits and politicians cannot or will not do tell the truth about Scottish schools Class Rules makes the key issues and information surrounding Scotland's education system accessible to all McEnaney delves into the successes and failures of the Curriculum for Excellence interrogates the rhetoric around closing the attainment gap between the richest and poorest pupils and considers the impact of the global Covid 19 pandemic Most importantly this book also looks to the future to ask what changes can be made to improve the system for young people across the country and is a must read for anyone interested in the future of schools in Scotland **Education in Scotland** Margaret M Clark, Margaret Clark, Pamela Munn, 2005-08-10

Education in Scotland is markedly different from what happens in the rest of the UK with a different National Curriculum school boards to oversee school management and a General Teaching Council which has been in existence since 1965 Whilst there are many examples of successful and innovative practice in Scotland the system is quite often not recognised as different by writers who talk about the UK education system as if it were one smooth whole This book describes recent developments in both legislation and practice in Scotland drawing comparisons with the English system Chapters cover administration and management the professional competence of teachers early years education provision the National Curriculum in Scotland Secondary Education Special Educational Needs Scottish Education T. Education in a Federal UK John Furlong, Ingrid Lunt, 2019-10-23 Britain's two recent referenda on Brexit 2016 and on Scottish independence 2014 have raised in the public mind fundamental questions about the future of the UK It seems that for the first time the public the media and the political elite have woken up to the fact that in different parts of the UK there are different histories different aspirations and different imagined futures in relation to a whole range of vitally important political issues But what the public debate often fails to recognise is that in many areas of public life perhaps especially education the UK is already a federal state and in key respects has been so for many years The aim of this volume is therefore to take stock to try and capture what the current state of educational policy and practice is across the whole of the UK This has been achieved by commissioning two different papers from each of the four countries Wales Scotland Northern Ireland and England The first is an overview exploring the distinctive history principles and current policies of each country The second paper has been specifically chosen as a case study of a key policy that highlights the distinctiveness of each country the Foundation Phase for Wales assessment policy in Scotland shared education initiatives in Northern Ireland and higher education policy in England Taken together these eight papers give an important insight into the complexities of educational policy and practice across the whole of the UK today This volume was originally published as a special issue of Oxford Review of Education **Studies in the History of Scottish Education, 1872-1939** Thomas R. Bone, 1967

Reconstructions of Secondary Education John Gray, Andrew McPherson, David Raffe, 2012-05-16 British secondary education has changed in major ways since 1945 This book examines some consequences and implications of both change and stability drawing on a unique series of national surveys of school leavers in Scotland The authors provide an empirical and theoretical account of central problems of contemporary schooling Their analysis covers certification curriculum and

selection the effects of educational expansion trends in educational inequality the impact of comprehensive reorganisation truancy and alienation from schooling the explanation of differences in performance between schools and the implications for the public accountability of schools From these analyses the authors develop a critique of the theory of the education system that underpinned expansion They examine this theory's logical and empirical status as myth and elaborate how the political system and social science might jointly overcome some of the methodological difficulties that beset social and educational research
