, **Digital Sensations** Ken Hillis,1999      *William Gibson* Gary Westfahl,2013-08-16 The leading figure in the development of cyberpunk William Gibson born in 1948 crafted works in which isolated humans explored near future worlds of ubiquitous and intrusive computer technology and cybernetics This volume is the first comprehensive examination of the award winning author of the seminal novel Neuromancer and the other books in the Sprawl trilogy Count Zero and Mona Lisa Overdrive as well as other acclaimed novels including recent bestsellers Pattern Recognition Spook Country and Zero History Renowned scholar Gary Westfahl draws upon extensive research to provide a compelling account of Gibson s writing career and his lasting influence in the science fiction world Delving into numerous science fiction fanzines that the young Gibson contributed to and edited Westfahl delivers new information about his childhood and adolescence He describes for the first time more than eighty virtually unknown Gibson publications from his early years including articles reviews poems cartoons letters and a collaborative story The book also documents the poems articles and introductions that Gibson has written for various books and its discussions are enriched by illuminating comments from various print and online interviews The works that made Gibson famous are also featured as Westfahl performs extended analyses of Gibson s ten novels and

Bartter,2004-04-30 Utopia forms a major aspect of human desire one that is as important as religion Understanding utopia and the ways in which it can collapse into dystopia is crucial in many disciplines Fantastic literature including science fiction and fantasy is the only form of literature that takes utopia dystopia seriously Therefore analysis of these works provides a basis for serious experimentation in social science In this volume critics analyze contemporary literary thought experiments such as 1984 and We They show how utopian experiments can easily slide into dystopia Exploring these fictional sociocultural political experiments gives us new ways to think about our lives and culture While literature history and political science professors may find this book useful it can also serve as a call to arms to anyone dedicated to maintaining freedom and humane living in the world today *Virtual Geographies* Sabine Heuser,2016-08-09 *Virtual Geographies* is the first detailed study to offer a working definition of cyberpunk within the postmodern force field Cyberpunk emerges as a new generic cluster within science fiction one that has spawned many offspring in such domains as film music and feminism Its central features are its adherence to a version of virtual space and a deconstructivist punk attitude towards high culture modernity the human body and technology from computers to prosthetics The main proponents of cyberpunk are analyzed in depth along with the virtual landscapes they have created William Gibson's *Cyberspace* Pat Cadigan's *Mindscape* and Neal Stephenson's *Metaverse* Virtual reality is examined closely in all its aspects from the characteristic narrative constructions employed to the esthetic implications of the virtual sublime and its postmodern potential as a discursive mode With its interdisciplinary approach *Virtual Geographies* opens up fresh perspectives for scholars interested in the interaction between popular culture and mainstream literature At the same time the science fiction fan will be taken beyond the conventional boundaries of the genre into such revitalizing domains as postmodern architecture and literature and into cutting edge aspects of science and social thought **Outlaws and Spies** McCarthy Conor McCarthy,2020-03-18 By reading two bodies of literature not normally read together the outlaw literature and espionage literature Conor McCarthy shows how these genres represent and critique the longstanding use of legal exclusion as a means of supporting state power Texts discussed range from the medieval Robin Hood ballads Shakespeare's history plays and versions of the Ned Kelly story to contemporary writing by John le Carre Don DeLillo Ciaran Carson and William Gibson

**Fiction 2000** George Edgar Slusser,T. A. Shippey,1992 Will novels and stories be relevant in the next millennium when the boundaries between illusion and reality and observer and observed may dissipate in a whirl of images signals and data This essay collection divines the prospects of fiction in the information age by examining cyberpunk literature A movement less than a decade old cyberpunk is driven by deep concerns about society ethics and new technology and has been defined

as the literature of the first generation of science fiction writers actually to live in a science fiction world These essays were first presented at the 1989 annual J Lloyd Eaton Conference on Science Fiction and Fantasy Literature the field's most prestigious international gathering They address concerns common not only to cyberpunk and traditional science fiction scholars critics and writers but to their counterparts outside the genre as well Interdisciplinary in perspective the essays consider the origins of cyberpunk the appropriation of its conventions by the mass media the literature's paradoxical retrogressive iconoclastic nature cyberpunk's affinities to and deviations from both traditional science fiction and postmodernist literature the parameters and components of the cyberpunk canon and the movement's future course Some essays are theoretical but all are grounded in works familiar to serious science fiction readers Neuromancer Frontera Deserted Cities of the Heart Islands in the Net Great Sky River the Mirrorshades anthology and others cyberpunk TV and cinema like the Max Headroom programs Blade Runner and Tron and precursory literature including Frankenstein Le Roman de l'avenir Ralph 124C 41 and A Clockwork Orange Useful for its views on a volatile science fiction subgenre Fiction 2000 is also valuable for what it tells us about the fate of mainstream literature

*Prosthesis* David Wills, 1995 Prosthesis is an experiment in critical writing that both analyzes and performs certain questions about the body as an artificial construction The book deals with the mechanical e.g. a mechanical prosthesis like a father's artificial leg in that most humanistic of discourses the artistic in order to demonstrate to what extent a supposedly natural creation relies on artificial devices of various kinds It is distinguished from a thematics of the prosthetic in literature by its complex articulation with accounts of the amputee father's discomfort slipping back and forth between an apparently constative and a more obviously performative mode in and out of fiction and autobiography Cutting across the terrains occupied traditionally by the history of medicine film studies art history philosophy psychoanalysis literary theory and fiction it finds an artistic or cultural pretext for each of its expositions a line from Virgil a painting by Conder a theory by Freud a film by Greenaway a text by Derrida novels by Roussel or Gibson a sixteenth century rhetoric that connects thematically or theoretically with the question of prosthesis
